Smart Teaching Janice Leroux, Edna McMillan, Joanne Close, 1993-01-01 Teacher's handbook on developing effective learning strategies for high ability pupils

Educating the Gifted and Talented Catherine Clark, Ralph Callow, 2013-01-11 Following the publication of the House of Commons Education Select Committee Report in 1999 the Department of Education and Employment has set up a number of initiatives including Excellence in Cities to address the problematic issues relating to provision for gifted and talented pupils in primary and secondary schools This book rehearses and develops further the central idea put forward by the authors in the first edition titled Educating Able Children that teachers remain the essential resource to ensure appropriate provision for gifted and talented pupils They suggest ways in which teachers may become an effective and efficient resource consider how teachers might take advantage of current initiatives to facilitate their own professional development provide ideas at classroom departmental and school level to facilitate appropriate provision and include a comprehensive and up to date list of resources

International Handbook on Giftedness Larisa Shavinina, 2009-08-12 If you publish you are trying to create something that is original that stands out from the crowd Above all you want to create something you are proud of Richard Branson 2002 p 57 After the publication of my bestselling International Handbook on Innovation publishers from around the world began to invite me to work on new books with them When Springer invited me to prepare the International Handbook on Giftedness I was on a maternity leave with my 3 months old and my 5 year old was just starting school I however had wanted to prepare such a Handbook for a long time and was waiting for just the right moment to dive right into such an endeavor The time had come and I agreed to prepare a Handbook that would expose readers to new views great discoveries and significant advancements of scientific knowledge exactly as Richard Feynman advised see his opening quote at the beginning of the introductory chapter I have always been convinced of the paramount significance of the topic of giftedness and gifted education to the world as a whole There is no doubt that gifted individuals were are and will be extremely important to society One way to understand the history of human civilization is via inventions and discoveries of the gifted All human cultural development builds on the amazing technological scientific educational and moral achievements of the human mind Today people increasingly realize that gifted and talented individuals are even more important than in the past

Tackling Disadvantage and Underachievement in Schools Diane Montgomery, 2020-03-13 This practical resource shows what teachers can do to combat disadvantage and underachievement in schools and from early years to secondary education Written by an experienced teacher teacher educator and chartered psychologist the book highlights effective teaching and learning methods that can be used to overcome barriers to learning satisfy different learning needs and help students achieve their full potential Packed with up to date research useful guidance and examples the book explores what schools have done and what they can do without need for extra resourcing It includes case studies that examine the types of underachievement

patterns that are found across age ranges and by detailing approaches in subject teaching defines the nature of effective learning and shows what strategies can be used to meet these criteria Moreover the chapters provide An exploration into the central needs of underachieving and disadvantaged learners across the ability range Information about how to audit the provision and the needs Accessible resources for the classroom changes that need to be made to the education and training of teachers Tackling Disadvantage and Underachievement in Schools is essential reading for teachers in early years education and primary and secondary schools teachers in training and their educators as well as leaders policymakers researchers and anyone interested in improving performance in schools

Educating Students with High Ability

Catherine Clark, Bruce M. Shore, 2004 Perceived to be academically successful highly able or gifted children often appear not to require much teacher assistance and subsequently are given less attention However these students do have needs and this book seeks to explain what these are and ways in which teachers can begin to meet them even when working in difficult circumstances with little support This revised second edition includes chapters on identification of high ability and the impact of that identification unrecognised ability teaching methods underachievement student teacher relations organisation of learning gender and culture general advice to teachers parental and community involvement

Able Underachievers

Diane Montgomery, 2000-10-30 This text is a discussion of how to deal with able underachievers in education It concludes that teaching and learning methods need to be modified to become learning oriented and centred rather than subject oriented and teacher centred

New Kinds Of Smart:

Teaching Young People To Be Intelligent For Today'S World Lucas, Bill, Claxton, Guy, 2010-03-01 New Kinds of Smart

presents the most important of these changes to practising teachers and educators and invites them to think about their implications for school

New Kinds of Smart: Teaching Young People to Be Intelligent for Today's World

Bill Lucas, Guy Claxton, 2010-03-16 How people think about education depends on how they understand the notion of intelligence Teaching reflects assumptions about what kinds of mental qualities are worth having and about the extent to which those qualities are fixed or malleable As the idea of intelligence changes so should the aims and methods of education It s time to bring intelligence into the real world In the early 21st century our understanding of the smart mind is changing fast The demands of society are now quite different from those when schools were first designed so the kinds of smart necessary to craft a happy and fulfilling life have changed As life becomes more complex ambiguous and uncertain so a different set of mental and emotional attitudes are needed to thrive Meanwhile researchers in the cognitive affective and learning sciences are developing new models of the smart mind that make it clear that bodies tools and social contacts are as much a part of intelligence as abstract problem solving New Kinds of Smart presents the most important of these changes to practising teachers and educators and invites them to think about their implications for school Each chapter illustrates the research

behind one of the emerging new kinds of smart summarises the messages that this research has for practitioners and presents practical examples tools and templates that educators can use to weave this new strand of thinking into their work as teachers and their lives as learners **CM ,1994**
