Al-Hoorie, Safoura Jahedizadeh, 2020-09-11 In this book we try to provide a practical down to earth guide for those who are involved in language learning and teaching We hope that this book will be a useful reading for those who would like to incorporate higher order thinking skills HOTS enhancing techniques in their teaching practice We set out from the position that although it is hardly doubtful that it is at the heart of education critical thinking is in reality often not given its due attention in pedagogy particularly in language education This book offers readers some practical advice on how to implement HOTS in their own practice It has been written to take the reader through each technique with the ultimate goal of promoting HOTS step by step In the introductory chapter we present an overview of the theory behind HOTS its definition its

relation to Bloom's Taxonomy its two dimensions critical thinking and reflective thinking and the ideas of some influential thinkers in this area. The subsequent chapters present six HOTS enhancing techniques that classroom teachers can draw from namely graphic organizers critical discourse analysis argumentation emotion regulation and emotional intelligence enhancing techniques reflective journals and mindfulness based strategies. As the book draws on a wide ranging review of literature with exercises for direct use with language learners we hope that this provides both theoretical and practical support for the teaching process to help language learners become effective critical thinkers. The compilation of the ideas in this book took us a long time over a decade. Something that takes such a long time requires much engagement and life experience so did this book.

Beginning University Andrew Wallace, Tony Schirato, 2020-09-10. Get good marks for your essays and assignments. Learn to think and write clearly. Find the information you need easily. Rethinking Online Education Bessie Mitsikopoulou, 2015-11-17. *Rethinking Online Education* analyzes online educational materials on the recent Iraq war aimed to be used by U.S. educators in elementary and secondary schools. It is suggested that far from being ideologically neutral these educational materials weave together resources which provide a coherent view of the Iraq war theme and can thus be seen as constituting a kind of an informal curriculum. Mitsikopoulou argues that the teacher resources adhere to different pedagogical discourses and constitute materializations of two broad approaches to education. A number of pedagogical issues are also raised in the discussion. What is the difference between critical thinking and critical pedagogy? How is the genre of lesson plan realized in different teaching philosophies and how do curricular texts change when they are delivered online? This important book highlights the need to explore the new forms of textuality which emerge from online curricular materials and to develop an understanding of the processes of text composition distribution and consumption.
