Their dentist is often too busy to present all the different choices one has and doesn't have the time to explain in detail what needs to be done. People have a fear of the unknown and a fear of dentistry is common. We all are concerned with doing what is best for us and our family while trying to keep costs down. There are many aspects of basic dental care we do not understand. The idea of when to see a dentist and if I go will I have pain are just some of the universal concerns. Here in one book are the answers we need.

Mastering Smile Design Nancy Saxena, Mehvish Saleem, Mayur Kaushik, 2024-10-31 Smile designing in periodontics is a specialized field within dentistry that focuses on improving the esthetic appearance of a patient's smile while considering the health and function of the periodontal tissues. Periodontists who are experts in treating gum diseases and supporting structures of teeth play a crucial role in smile designing alongside other dental specialists like prosthodontists, orthodontists, and cosmetic dentists.

Designing a Smile. An Integrated Approach Nikita Bhosale, Pallavi Gopashetti, 2020-09-25 Document from the year 2020 in the subject Medicine Dentistry course master of dental surgery language English abstract This book assembles complete knowledge starting from what an ideal smile comprises of esthetic diagnosis and treatment planning. Smile design is a relatively new discipline in the area of cosmetic dentistry and it involves several areas of micro esthetics and macro esthetics and further treatment planning. As mentioned earlier macro esthetic principles are only part of the overall picture. gingival esthetics, facial esthetics, and micro esthetics are the other three essential components of effective smile design. Thus the comprehensive interdisciplinary approach should be included such as Interdisciplinary diagnosis and treatment planning, Leveling and alignment of the dentition, Vertical management, Assessment of the incisal edge, gingival margin relationships for possible need of orthodontic intrusion, excisional gingivectomies or definitive crown lengthening procedures, Restorative phase, Ideal restoration of anterior teeth with direct composite resin bonding based on principles of tooth form and proportionality, Prosthodontic finishing details and modification of the composite restorations as needed and retention, Long term follow up.

Therefore using a comprehensive approach of esthetic treatment planning can help achieve the smile that best enhances the overall facial appearance of the patient and provides the additional benefit of enhanced oral health. An attractive and pleasing smile visibly enhances the acceptance of the individual in the society and the character of the smile influences the attractiveness and the personality of the individual and so have the Dentists or technicians traditionally made choices about esthetic treatment through knowledge of each and every element to reflect it on to the patients demand.
