Smokestack Diplomacy:

Smokestack Diplomacy Robert G. Darst, 2001-01-02 Many environmental problems cross national boundaries and can be addressed only through international cooperation In this book Robert Darst examines transnational efforts to promote environmental protection in the USSR and in five of its successor states Russia Ukraine and the Baltic republics of Estonia Latvia and Lithuania from the late 1960s to the present The core of the book is a comparative study of three key issues nuclear power safety transboundary air pollution and Baltic Sea pollution Although expectations were high that the end of the Cold War and the breakup of the Soviet Union would lead to increased East West environmental cooperation the opposite has been true Russia and the other successor states have generally agreed to address such problems only when paid to do so Darst finds that post Cold War environmental cooperation has been most successful when there is an overlap between the environmental and economic interests of the successor states and those of their Western neighbors and when the foundation for cooperation was laid during the Cold War period The book is based on extensive original field research including interviews with diplomats government officials scientists and environmental activists in the successor states and Western Europe Its findings underscore the importance of the domestic and international political context in which international environmental policy making occurs It also deepens our understanding of the opportunities and dangers of positive inducements as a tool of international environmental policy

Institutional Analysis and Economic Policy Marc R. Tool, Paul Dale Bush, 2012-12-06 The purpose of this volume is to demonstrate how contemporary institutional economic analysis can be applied to the resolution of economic problems All of the essays in this book challenge the conventional wisdom in the problem areas addressed They advocate policy positions that often run contrary to views widely held by academic economists and policy makers alike The general literature of institutional economics is unorthodox beginning with its methodological foundations and continuing through the kind of policy analysis found in these pages The orthodox tradition in economics is commonly characterized as neoclassical economics Neoclassical economics fosters the myth that only the market can efficiently allocate a society's economic resources and equitably

distribute its income It provides the intellectual defense for in which free markets are championed over democratic capitalist ideology policy formation which it contends is neither efficient nor equitable For both professional economists and policy makers of a conservative political persuasion neoclassical economics writes the script for a morality play in which the market is the good guy and the government is the bad guy As such it undermines the belief that free societies can enhance economic welfare through the use of democratic processes in the formulation of economic policies

Other Animals Jane T. Costlow, Amy Nelson, 2010-08-15 The lives of animals in Russia are intrinsically linked to cultural political and psychological transformations of the imperial Soviet and post Soviet eras Other Animals examines the interaction of animals and humans in Russian literature art and life from the eighteenth century until the present The chapters explore the unique nature of the

Russian experience in a range of human animal relationships through tales of cruelty interspecies communion and compassion and efforts to either overcome or establish the human animal divide Four themes run through the volume the prevalence of animals in utopian visions the ways in which Russians have incorporated and sometimes challenged Western sensibilities and practices such as the humane treatment of animals and the inclusion of animals in urban domestic life the quest to identify and at times exploit the physiological basis of human and animal behavior and the ideological implications of these practices and the breakdown of traditional human animal hierarchies and categories during times of revolutionary upheaval social transformation or disintegration From failed Soviet attempts to transplant the seminomadic Sami and their reindeer herds onto collective farms to performance artist Oleg Kulik s scandalous portrayal of Pavlov s dogs as a parody of the Soviet new man to novelist Tatyana Tolstaya s post cataclysmic future world of hybrid animal species and their disaffection from the past *Other Animals* presents a completely new perspective on Russian and Soviet history It also offers a fascinating look into the Russian psyche as seen through human interactions with animals
