contemporary scholar practitioners to chart the evolution of storytelling from traditional foundations to its current multifarious presence in American life The years since his classic *The Storytellers Journey An American Revival* 1999 have brought seismic shifts in storytelling circles Essays gathered here move between cultural history critical analysis and

personal narratives to showcase the efforts of traditional and contemporary storytellers to make their presence felt in the world. The book begins with an account of recent changes in the storytelling landscape including the growth of a new generation of urban personal storytelling venues sparked by *The Moth*. Next is a suite of essays on Appalachian Jack tales, the best known cycle of traditional American wonder tales, and an account of its most celebrated practitioners including close encounters with the traditional master Ray Hicks. The next set examines frames through which storytellers capture truth, historical, legendary, literary, oral, traditional, and personal. Stylistic differences between northern and southern tellers are affectionately portrayed with a special look at the late, much loved Alabamian Kathryn Tucker Windham. The final section makes the case for informed critical writing on storytelling performance through a survey of notable contemporary storytellers. Work on the ethics of storytelling, genres, and a nuanced probe of truth and fiction in storytelling settings. A tapestry of personal stories, social criticism, and artistic illuminations. *Liars, Damn Liars, and Storytellers* is valuable not only to scholars and students in performance, folklore, cultural studies, and theater but also to general readers with a love for the storytelling art.

Literacy 101 David Booth, 2016-06-20 In this expansive survey, David Booth, one of our foremost authorities on teaching literacy, answers real questions from teachers like you about turning research and theory into effective best practice. Teachers will find the answers they need and can use on almost any topic, from phonics and word walls for beginning readers to guided reading, literature circles, and writing journals and workshops for more confident readers. From using traditional texts to comics, songs, and the Internet to cover the complete gamut of the new literacies, from using testing as a teaching tool to creating a classroom community that is both diverse and welcoming. But *Literacy 101* is more than just a guide; it's also the compelling story of one teacher's journey through literacy. David writes frankly about what has worked and not worked for him over the years and how what looks good on paper may need to be adapted for a real classroom.

Good Books Matter Larry Swartz, Debbie Nyman, 2008 Based on extensive research on the features that make children's books appealing and appropriate, this valuable teacher resource offers guidance on selecting books, strategies for specific grade levels, suggestions for extension, and tips for assessment. This teacher-friendly book is organized around the major genres: traditional literature, picture books, nonfiction, poetry, and multicultural texts that will inspire young readers. Throughout the book, teachers will find suggestions for using literature to implement shared reading, reading aloud, and response strategies with emergent, developing, and independent readers. This comprehensive book is rooted in the belief that educators must consider and offer a wide range of choice to ensure that students read good books. It argues that the choices children make about what they read should be governed by their interests and desire to learn, not by a grade or reading level.
