Supplement to the Handbook of Middle American Indians, Volume 1 Victoria Reifler Bricker, Jeremy A. Sabloff, 2014-01-07 The sixteen volume Handbook of Middle American Indians completed in 1976 has been acclaimed the world over as the most valuable resource ever produced for those involved in the study of Mesoamerica. When it was determined in 1978 that the Handbook should be updated periodically, Victoria Reifler Bricker, well known cultural anthropologist, was selected to be series editor. This first volume of the Supplement is devoted to the dramatic changes that have taken place in the field of archaeology. The volume editor, Jeremy A. Sabloff, has gathered together detailed reports from the directors of many of the most significant archaeological projects of the mid twentieth century in Mesoamerica, along with discussions of three topics of general interest: the rise of sedentary life, the evolution of complex culture, and the rise of cities.

Early Mesoamerican Cities Michael Love, Julia Guernsey, 2022-01-06 Urbanization is a phenomenon that brings into focus a range of topics of broad interest to scholars. It is one of the central enduring interests of anthropological archaeology. Because urbanization is a transformational process, it changes the relationships between social and cultural variables such as demography, economy, politics, and ideology. As one of a handful of cases in the ancient world where cities developed independently, Mesoamerica should play a major role in the global comparative analysis of first generation cities and urbanism in general. Yet most research focuses on later manifestations of urbanism in Mesoamerica, thereby perpetuating the fallacy that Mesoamerican cities developed relatively late in comparison to urban centers in the rest of the world. This volume presents new data, case studies, and models for approaching the subject of early Mesoamerican cities. It demonstrates how the study of urbanism in Mesoamerica and all ancient civilizations is entering a new and dynamic phase of scholarship.

The Ancient Maya of Mexico Geoffrey E. Braswell, 2014-10-14 The archaeological sites of Mexico's Yucatan peninsula are among the most visited ancient cities of the Americas. Archaeologists have recently made great advances in our understanding of the social and political milieu of the northern Maya lowlands. However, such advances have been underrepresented in both scholarly and popular literature until now. *The Ancient Maya of Mexico* presents the results of new and important archaeological, epigraphic, and art historical research in the Mexican states of Yucatan, Campeche, and Quintana Roo. Ranging across the Middle Preclassic to the Modern periods, the volume explores how new archaeological data has transformed our understanding of Maya history. *The Ancient Maya of Mexico* will be invaluable to students and scholars of archaeology and anthropology and all those interested in the society, rituals, and economic organization of the Maya region.

Cahokia, the Great Native American Metropolis Biloine W. Young, Melvin Leo Fowler, 2000 Five centuries before the Pilgrims landed in Massachusetts, indigenous North Americans had already built a vast urban center on the banks of the Mississippi River where East St. Louis is today. This is the story of North America's largest archaeological site, told through the lives, personalities, and conflicts of the men and women who excavated and studied it. At its height, the metropolis of Cahokia had twenty thousand inhabitants in the city center, with another ten thousand in the outskirts. Cahokia was a precisely planned community with a fortified central city and surrounding suburbs. Its entire plan reflected the Cahokian's concept of the cosmos. Its centerpiece, Monk's Mound, ten stories tall, is the largest pre-Columbian structure in North America, with a base circumference larger than that of either the Great Pyramid of Khufu in Egypt or the Pyramid of the Sun at Teotihuacan in Mexico. Nineteenth-century observers maintained that the mounds too sophisticated for primitive Native American cultures had to have been created by a superior non-Indian race, perhaps even by survivors of the lost continent of Atlantis. Melvin Fowler, the dean of Cahokia archaeologists, and Biloine Whiting Young tell an engrossing story of the struggle to protect the site from the encroachment of interstate highways and urban sprawl. Now identified as a World Heritage Site by UNESCO and protected by the Illinois Historic Preservation Agency, Cahokia serves as a reminder that the indigenous North Americans had a past of complexity and great achievement.

The Neighborhood as a Social and Spatial Unit in Mesoamerican Cities M. Charlotte Arnauld, Linda R. Manzanilla, Michael E. Smith, 2012-12-06 Recent realizations that prehispanic cities in Mesoamerica were fundamentally different from western cities of the same period have led to increasing examination of the neighborhood as an intermediate unit at the heart of prehispanic urbanization. This book addresses the subject of neighborhoods in archaeology as analytical units between households and whole settlements. The contributions gathered here provide fieldwork data to document the existence of sociopolitically distinct neighborhoods within ancient Mesoamerican settlements, building upon recent advances in multi-scale archaeological studies of these communities. Chapters illustrate the cultural variation across Mesoamerica, including data and interpretations on several different cities, with a thematic focus on regional contrasts. This topic is relatively new and complex.

and this book is a strong contribution for three interwoven reasons First the long history of research on the Teotihuacan barrios is scrutinized and withstands the test of new evidence and comparison with other Mesoamerican cities Second Maya studies of dense settlement patterns are now mature enough to provide substantial case studies Third theoretical investigation of ancient urbanization all over the world is now more complex and open than it was before giving relevance to Mesoamerican perspectives on ancient and modern societies in time and space This volume will be of interest not only to scholars and student specialists of the Mesoamerican past but also to social scientists and urbanists looking to contrast ancient cultures worldwide

Collective Action in the Formation of Pre-Modern States Richard Blanton, Lane Fargher, 2008 Anthropological archaeology and other disciplines concerned with the formation of early complex societies are undergoing a theoretical shift Given the need for new directions in theory the book proposes that anthropologists look to political science especially the rational choice theory of collective action The authors subject collective action theory to a methodologically rigorous evaluation using systematic cross cultural analysis based on a world wide sample of societies
