[Data for PCBs](#) Tees,1994-06-15 PCBs have been produced commercially for a long time and for a variety of uses However their chemical and physical stability has been found to be responsible for the PCBs environmental contamination problem The discovery of widespread environmental occurrence of PCBs and their apparent link to carcinogenesis drew public attention to the problem leading to new legislation regulating PCBs Although regulations and requirements differ from country to country there is a common global analytical interest in determining their presence in the different matrices and in the environment The purpose of this book is to provide a comprehensive compilation of spectral data for the complete set of PCBs **A Guide to the HPLC Literature: 1980-1981** Henri Colin,1984 HPLC has largely contributed to the development

stoichiometry This method of the in situ investigation of the crystal composition directly at high temperatures 3 4 proved to be of an unparalleled precision of 10^{-10} at % and made it possible to obtain in an analytical form functional dependences of the crystal composition on temperature pressure and composition of the crystallizing matrix for crystals with sub O 1 at % range of existence
