The Harvest of the Years Luther Burbank, 1926 **The Harvest of the Years** Luther Burbank, Wilbur Hall, 1927
Luther Burbank a renowned plant breeder dedicated most of his life to conducting numerous plant experiments but only started documenting his findings and thoughts in detail when he was already quite old indicating a lifelong desire to share his knowledge that was only partially fulfilled later in life due to a lack of time to record his observations He was past sixty before he could find the time he desired for the making of exact records of his innumerable and unique experiments with plants he was seventy before the itch that had always been on him to express on paper his thoughts reactions observations and philosophies could be even in slight measure gratified Unquestionably if he had lived he would have poured forth his naturalist s soul and the last years would have been productive of exhilarating pungent and enlightening essays and books that would have greatly enriched our literature through his thoughts and comments What is saved of all the treasure he had stored happens to be this volume **The Harvest of the Years** Hope Daring, 1938 *The Harvest of the Years* Raymond Wheeler, 1980 *A Study in Trade-Cycle History* R. his vast insight into French monetary history and his thorough technical knowledge of French coinage and minds of the period the author maps the historical and spatial perspectives of the two and a half centuries when France experienced successive periods of inflation as bullion copper and credit emerged into the forefront of economic affairs To illustrate the way in which the sequence of these periods affected the structure of the French economy he discusses how the relative supply and demand of the metals used in varying degrees as a medium of exchange increased the demand for the metal and influenced the credit system Credit thus made a special contribution in coordinating and adjusting the various inconsistencies in the production and circulation of the different metals Throughout his study Spooner attributes an important role to money as a significant factor in economic change and development in early modern Europe and focuses on the relationship between the supply of money and the level and pattern of economic activity **Statistical Bulletin** ,1987
