*The Future of Human Reproduction* John Harris, Søren Holm, 1998 ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester Søren Holm University of Copenhagen Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany

The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes. All too often ethical analysis has lagged behind these changes. The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just healthcare trainees and professionals but also social scientists, philosophers, lawyers, social workers and legislators. The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest. Philosophers, doctors and lawyers from several countries already feature among the authors lined up for the series. It promises to become the leading channel for the best original work in this burgeoning field. This volume *The Future of Human Reproduction* brings together new work by an international group of contributors from various fields and perspectives on ethical, social and legal issues raised by recent advances in reproductive technology. These advances have put us in a position to choose what kinds of children and parents there should be. The aim of the essays is to illuminate how we should deal with these possibilities for choice. Topics discussed include gender and race selection, genetic engineering, fertility treatment, ovarian tissue transfer and post menopausal pregnancy. The central focus of the volume is the interface between reproductive choice and public regulation. *The Future of Human Reproduction* is a roadmap for twenty first century reproductive technologies written by leading thinkers in the field for philosophers, policy makers and clinicians. However it will perhaps be equally useful for parents and other members of our most important social institutions as we struggle to cope with the rapidly changing reproductive horizon.
