Henry Irwin and the Indo Saracenic Movement

Reconsidered Pradipt Kumar Das, 2014-07-23 The book focuses on Henry Irwin a man who began his life in India as a PWD engineer and subsequently rose to the position of consulting architect to the government of Madras succeeding Robert Fellowes Chisholm his predecessor in that office Many of Irwin's creations continue to dominate the Madras skyline and are held in high esteem by local denizens However the blatant hybridity of some of these monuments coupled with the fact that they failed to reflect the attempt to legitimize colonial rule also accounted for their transience as an architectural movement Parallels drawn with the colonial architecture of Calcutta and Bombay not to speak of the impact of Indo Saracenic architecture on some of India's princely states draw attention to the movement Likewise its authenticity has been questioned against the backdrop of the architectural legacy of the home country during the same period

Women Architects in India Mary N. Woods, 2016-10-04 As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today this book reveals a history that is largely unknown not only in the West but also in India Educated in the 1930s and 1940s the very first women architects designed everything from factories to museums in the post independence period The generations that followed are now responsible for metro systems shopping malls corporate headquarters and IT campuses for a global India But they also design schools cultural centers religious pilgrimage hotels and wildlife sanctuaries Pioneers in conserving historic buildings these women also sustain and resurrect traditional crafts and materials empower rural and marginalized communities and

create ecologically sustainable architectures for India Today although women make up a majority in India's ever increasing schools of architecture it is still not easy for them like their Western sisters to find their place in the profession Recounting the work and lives of Indian women as not only architects but also builders and clients opens a new window onto the complexities of feminism modernism and design practice in India and beyond Set in the design centers of Mumbai and Delhi this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers The diversity of practices represented here helps us to imagine other ways to create and build apart from starchitecture And how these women negotiate tradition and modernity at work and at home is crucial for understanding gender and modern architecture in a more global and less Eurocentric context In a country where female emancipation was important for narratives of the independence movement and the new nation state feminism was nonetheless eschewed as divisive and damaging to the nationalist cause Class caste tradition and family restricted but also created opportunities for the very first women architects in India just as they do now for the growing number of young women professionals today
