The Humanizing Brain Where Religion And Neuroscience Meet

Andrew Newberg, Mary Clare Smith

The Humanizing Brain Where Religion And Neuroscience Meet:

The Humanizing Brain James B. Ashbrook, Carol Rausch Albright, 1997 The authors raise the question of the connection between the brain's drive to seek meaning and reality and religion. Religion they argue links what is immediate in our lives with what transcends and transforms them.

What is Neurotheology? Brian C. Alston, 2007 The new discipline Neurotheology is the scientific study of how human physiology, the brain in particular, and mind experience interpret, generate, and mediate beliefs. The discipline engages meaningfully diverse understandings of reality including the physical, mental, and spiritual. Its primary objectives are the following:

1. Establish comprehensive interdisciplinary approaches to understand beliefs.
2. Explain, interpret, and predict the influences of beliefs on thought, feeling, behavior, and experience.

As a discipline, Neurotheology affords different branches of science like biology, cognitive science, genetics, neuroscience, and psychology opportunity to develop distinct approaches to understand and explain the relationship between brain, mind, and beliefs. This essay offers a framework to establish Neurotheology as a valuable discipline while sharing over 250 sources in this new genre. Viewpoints from neuroscience will serve as application for examination.

Catholic Neurotheology Andrew Newberg, Mary Clare Smith, 2024-07-02 The topic of neurotheology has garnered increasing attention in the academic, religious, scientific, and popular worlds. It is the field of study that explores the intersection between the brain and religious and spiritual phenomena. However, there have been no extensive attempts at exploring specifically how Catholic religious thought and experience may intersect with neurotheology. The purpose of Catholic Neurotheology is to fully engage this groundbreaking area. Topics are related to a neurotheological approach to the foundational Catholic beliefs derived from Scripture and Tradition; an exploration of the various elements of Catholicism and of Catholic rituals and practices; and a review of Catholic spiritualities and mysticism. Specific Catholic scholars are considered in terms of the relationships among their ideas, teachings, and different brain processes. Catholic Neurotheology engages these topics in an easy-to-read style and incorporates scientific, religious, philosophical, and theological aspects of the emerging field of neurotheology. By reviewing the concepts in a stepwise, simple yet thorough discussion, readers regardless of their background will be able to understand the complexities and breadth of neurotheology from a Catholic perspective. More broadly, issues include a review of the neurosciences and neuroscientific techniques; religious and spiritual experiences; theological development and analysis; liturgy and ritual; philosophy; epistemology; and ethics and social implications, all from a Catholic perspective.

Religion and the Body, 2012-02-17 This book reflects on the implications of neurobiology and the scientific worldview on aspects of religious experience, belief, and practice, focusing especially on the body and the construction of religious meaning.

Human Development and Faith (Second Edition) Felicity Kelcourse, 2015-07-28 Updated with the latest research, this second edition approaches human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of the life cycle, *Human Development and Faith* examines the interplay of mind, body, family, community, and soul.

at every stage of development Back cover **God and Dreams** John Pratt Bingham,2010-01-01 At one time when an individual wanted a direct personal experience of God that person turned to his or her dreams The early third century Christian defender of the faith Tertullian observed Is it not known to all people that the dream is the most usual way that God reveals himself to man Yet by the eleventh century King William II of England states They are not good Christians that regard dreams Why did this reversal of opinion occur not only in Christian thinking but in Jewish and Islamic attitudes also God and Dreams Is There a Connection traces the historic connection between God and dreams and examines why this shift happened While particular attention is given to Jewish Christian and Islamic thought several secular disciplines are discussed also After investigating the different points of view an argument is made that the connection between God and dreams still exists

Fundamental Theology Matthew L. Becker,2024-01-25 Encyclopedic in scope this book offers wide ranging coverage of the foundational teachings and practices within the mainstream of the classical Christian tradition It begins with their roots in the Scriptures and also branches out into Eastern and Western Christianity ancient medieval and modern to the present day Part I provides an overview of some of these routes then presents an historical survey of Christianity s major traditions Part II unpacks some of the character of that revelation focusing particularly on epistemological and procedural questions Finally Part III looks at Christian theology in a university setting the possibility and shape of theology as a university discipline its major subfields and its relations with humanities and the sciences respectively Fundamental Theology A Protestant Perspective 2nd edition includes a wide range of pedagogical features each chapter begins with an outline thesis statement highlighted in bold charts and graphs relevant headings and subheadings employed throughout the book keywords provides a survey of pertinent reference literature questions for review and discussion annotated suggestions for further reading

Interactive World, Interactive God Carol Rausch Albright,John R. Albright,Mladen Turk,2017-11-06 Since the dawn of science ideas about the relation between science and religion have always depended on what else is going on in a society During the twentieth century daily life changed dramatically Technology revolutionized transportation agriculture communications and housework People came to rely on scientific predictability in their technology Many wondered whether God s supposed actions were consistent with scientific knowledge The twenty first century is bringing new scientific research capabilities They are revealing that scientific results are not totally predictable after all Certain types of interaction lead to outcomes that are unpredictable in principle These in turn may lead to a whole new range of potential interactions They do not rule out the reality of a dynamic God who can act in the world without breaking the known principles of science God may in fact work with the way things really are Human experience of God may accurately reflect this reality Interactive World Interactive God illustrates such new understandings in religion and science by describing recent developments in a wide range of sciences and providing theological commentary The book is written for intelligent readers who may not be specialized in science but who are looking for ways to understand divine action in today s world **Commun(ica)ting**

Bodies Anna-Katharina Höpflinger, Alexander D. Ornella, Stefanie Knauss, 2016-10-20 As a basic medium of human interaction the body is fundamental to socio cultural communication systems in particular the communication system of religion This innovative and ground breaking volume studies these systems and the role that the body plays in their organization through the perspective of the concept of body as a medium and by drawing on media and communication theory

The Child in American Evangelicalism and the Problem of Affluence David A. Sims, 2009-06-01 This work presents an evangelical theology of the child nurtured in the context of American evangelicalism and affluence It employs an eclectic theological critical method to produce a theological anthropology of the affluent American evangelical child AAEC through interdisciplinary evangelical engagement of American history sociology and economics Sims articulates how affluence constitutes a significant impediment to evangelical nurture of the AAEC in the discipline and instruction of the Lord Thus the problem he addresses is nurture in evangelical affluence conceived as a theological anthropological problem Nurture in the cultural matrices of the evangelical affluence generated by technological consumer capitalism in the U S impedes spiritual and moral formation of the AAEC for discipleship in the way of the cross This impediment risks disciplinary formation of the AAEC for capitalist culture cultivates delusional belief that life consists in an abundance of possessions and hinders the practice of evangelical liberation of the poor on humanity s underside The result is the AAEC s spiritual moral lack in late modernity Chapter 1 introduces the problem of the AAEC Chapters 2 and 3 provide a diachronic lens for the theological anthropology of the AAEC through critical assessment of the theological anthropologies of the child in Jonathan Edwards Horace Bushnell and Lawrence Richards Chapters 4 and 5 constitute the synchronic perspective of the AAEC Chapter 4 presents an evangelical sociology of the AAEC drawing upon William Corsaro s theory of interpretive reproductions and chapter 5 constructs an evangelical theology of the AAEC through critical interaction with John Schneider s moral theology of affluence Chapter 6 Whither the AAEC concludes with a recapitulation of the work and a forecast of possible futures for the AAEC in the twenty first century
