The Hunger Crop Poverty And The Sugar Industry:

The Hunger Crop Belinda Coote,1987 **The Mediality of Sugar** ,2022-10-24 The Mediality of Sugar probes the potential of reading sugar as a mediator across some of the disciplinary distinctions in early twenty first century research in the arts literature architecture and popular culture Selected artistic practices and material cultures of sugar across Europe and the Americas from the sixteenth to the twenty first century are investigated and connected to the transcontinental and transoceanic history of the sugar plants cane and beet their botanical and cultural dissemination and global sugar capital and trade under colonialism and in decoloniality The collection contributes to the vision of a Transnational and Postdisciplinary Sugar Studies *The Visionary Realism of German Economics* Erik S. Reinert,2019-02-15 The Visionary Realism of German Economics forms a collection of Erik S Reinert s essays bringing the more realistic German economic tradition into focus as an alternative to Anglo Saxon neoclassical mainstream economics Together the essays form a holistic theory explaining why economic development by its very nature is a very uneven process Herein lie the important policy implications of the volume

The Political Economy of the Sugar Industry in Zimbabwe, 1920-90 A. S. Mlambo,E. S. Pangeti,1996 **Resource Sustainability and Caribbean Development** Duncan F. M. McGregor,David Barker,Sally Lloyd-Evans,1998 Resource Sustainability and Caribbean Development follows on from Barker and McGregor s earlier edited volume Environment and Development in the Caribbean Geographical Perspectives 1995 and aims to focus more specifically on the theme of sustainability and to examine research contributions of geographers to problems of sustainability in the Caribbean region While the problems of environmental degradation have increased in recent decades the ability of Caribbean governments to cope with the consequences appears to have been eroded There is however a growing recognition within the region of the need for development strategies that focus on the social needs of the people yet simultaneously protect the fragile natural environment It is hoped that the research presented here will serve to inform the wider research and decision making community of the main problems associated with resource sustainability in the region and of some of the major research directions crucial to the alleviation of these problems Preface King Sugar Michele Harrison,2001-08 What is life like on a sugar plantation at the end of the twentieth century What will happen if the sugar industry collapses How do the poverty stricken cane cutters of rural Jamaica fit into the global economy And how does sugar make its way from the canefield to our kitchens The Caribbean s history is inseparable from sugar In Jamaica entire communities depend on the sugar industry earning a precarious living on old fashioned plantations For many the crop even doubles as currency But as the advanced nations reassess the economic policies that keep sugar alive time is running out for the island s industry King Sugar looks at the world sugar business identifying the key playersproducers markets and transnational companiesand explaining how the industry works It explores the economics and politics of trading agreements the mysteries of the futures market and the technology of sugar production Based on interviews with traders buyers and producers it provides a unique look at the

history of this commodity King Sugar also looks in detail at how ordinary people fit into this global industry Through interviews with workers on a plantation she provides a vivid picture of producers and the crises they face The book finally assesses the future of sugar both in Jamaica and the wider world and considers the options for those still ruled by King Sugar

The Oxfam Poverty Report Kevin Watkins,1995 Fifty years ago the United Nations Charter proclaimed universal rights to shared prosperity peace and security How far has that vision of world citizenship been realised Despite advances in human welfare and technology there is today a growing polarisation between rich and poor One in four of the world s people live in absolute poverty unable to meet their basic needs armed conflict is affecting millions of people and the global environment is under threat Yet there is a failure of political will to address the silent emergency of poverty The Oxfam Poverty Report draws on Oxfam s experience of working in over 70 countries to examine the causes of poverty and conflict It identifies the structural forces which deny people their basic rights and gives a wide range of examples of the ways in which men and women are bringing about positive change at every level from the household to the international arena Oxfam believes that it is time to renew the UN vision of universal basic rights The Report concludes by proposing policy and institutional reforms which would transform international institutions and trading relations and calls for a new commitment to work together to eradicate poverty and bring sustainable peace and security for all the world s people

The Condition of Sustainability Ian Drummond,Terry Marsden,2005-06-23 The Condition of Sustainability explores the political economy of sustainable development and presents a new and powerful way of thinking about sustainable development as well as a methodology for applying these ideas

The Other Canon of Economics, Volume 1 Erik Reinert,2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s development strategies that Reinert argues should be seen as industrial strategies
