The Information Society William J. Martin, 1988 **The Information Society** Armand Mattelart, 2003-04-03 The impact of the information society are multiform and transdisciplinary There are few areas of social political and economic life that have not been affected or challenged by the new technologies of information and communication In this short introduction Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century Critically he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced Combining a long term historical and geopolitical perspective Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool This introduction will be of interest to all students of media and communication as well as social scientists in general *The Information Society Reader* with Raimo Blom, Erkki Karvonen, Harri Melin, Kaarle Nordenstreng, Ensio Puoskari, Frank Webster, Professor Frank Webster, 2020-04-02 There has been much debate over the idea of the information society Some thinkers have argued that information is becoming the key ordering principle in society whereas others suggest that the rise of information has been overstated Whatever the case it cannot be denied that informatization has produced vast changes in advanced societies The Information Society Reader pulls together the main contributions to this debate from some of the key figures in the field Major topics addressed include post industrialism surveillance transformations the network society democracy digital divisions virtual relations With a comprehensive introduction from Frank Webster selections from Manuel Castells Anthony Giddens Michel Foucault and Christopher Lasch amongst others and section introductions contextualising the readings this book will be an invaluable resource for students and academics studying contemporary society and all things cyber The Information Society Herbert S. Dordick, Georgette Wang, 1993-06-16 The past three decades have witnessed the worldwide growth of an information industry and the definition of the new information sector With modern telecommunications and information technology the industrialized nations are creating a system in which information goods and services can be bought and sold as in a goods market place This book defines informatization in three ways infrastructure economic and social The analysis focuses on 19 countries which are categorized as high middle and low income nations by Gross Domestic Product per capita The countries include Australia Brazil Canada China France Germany Hong Kong India Japan Mexico the Netherlands New Zealand Singapore South Korea Taiwan UK and USA *The Global Information Society* William J. Martin, 2017-07-05 Today information and the technologies that store and disseminate it are producing deep rooted and widespread changes in society changes of the same magnitude as those that occurred during the Industrial Revolution The purpose of this book is to give a complete picture of the information society by examining in detail the social economic political and cultural roles of information and information technology This book is effectively a second edition of the author s

classic *The Information Society* In it the author illustrates the major trends in and inter relationships between information information and communication technologies and the global economy and society In tracing the direction of information based change he reveals the implications for ordinary citizens for the quality of everyday life for economic and social activity and examines the prospects of nations and trading blocs This book provides a new way of looking at society one that is essential for understanding social and economic structures and processes in the information age *The Information Society* David Lyon,1988-01 *Theories of the Information Society* Frank Webster,2002 In the first edition of *Theories of the Information Society* Frank Webster set out to make sense of the information explosion taking a sceptical look at what thinkers mean when they refer to the information society and critically examining all the major post war theories and approaches to informational development **The Information Society as Post-industrial Society** Yoneji Masuda,1981 *Society to an information Society* **The Information Society Reader** Frank Webster,Raimo Blom,2004 Pulling together contributions to the information society debate from some of the field s key figures this book addresses and examines key topics providing an invaluable resource for students and academics alike *The Information Society* Robert Hassan,2008-11-03 What are we to make of the information society Many prominent theorists have argued it to be the most profound and comprehensive transformation of economy culture and politics since the rise of the industrial way of life in the 18th century Some saw its arrival in a positive light where the dreams of democracy of connectivity and efficiency constituted a break with the old ways But other thinkers viewed it more in terms of the recurrent nightmare of capitalism where the processes of exploitation commodification and alienation are given much freer rein than ever before In this book Robert Hassan a prominent theorist in new media and its effects analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon Surveying the works of major information society theorists from Daniel Bell to Nicholas Negroponte and from Vincent Mosco to Manuel Castells *The Information Society* is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible
