The Inner Limits Of Mankind Heretical Reflections On Today's Values Culture And Politics:

The Inner Limits of Mankind Ervin Laszlo, 1989 An examination of contemporary values and attitudes in which a systems scientist and philosopher explore ways in which each of us can contribute to their transformation and argue for the emergence of a new globally oriented environmentally conscious spiritually aware thinking person **Culture's Consequences** Geert Hofstede, 1984 In his bestselling book *Culture's Consequences* Geert Hofstede proposed four dimensions on which the differences among national cultures can be understood Individualism Power Distance Uncertainty Avoidance and Masculinity This volume comprises the first in depth discussion of the masculinity dimension and how it can help us to understand differences among cultures The book begins with a general explanation of the masculinity dimension and discusses how it illuminates broad features of different cultures The following parts apply the dimension more specifically to gender and gender identity sexuality and sexual behaviour and religion probably the most influential variable of all Hofstede closes the book **The Laszlo Chronicle** Gyorgyi Szabo, 2017-01-24 This study analyses the fifty year evolution of Ervin Laszlo's contribution to science and philosophy It records the major turning points in his thinking and discusses who and what influenced this evolution and with what result Laszlo's search for answers to questions such as man's relationship to nature and the cosmos and the nature of underlying factors of evolution which connect all things were not satisfied by working only on the basis of the General Evolutionary Systems Theory Wittgenstein said In every serious philosophical question uncertainty extends to the very roots of the problem We must always be prepared to learn something totally new Laszlo did discover something entirely new the theory of the information field after immersing himself in a range of areas of study such as cosmology consciousness studies quantum physics metaphysics and various Eastern traditions The integration of his earlier works with his more recent studies lies behind his explanation of the existence of the Akashic Field The Akashic Field is a term that refers to an interactive universe communicating in a subtle manner which connects everything with every other thing everywhere This is a pure information field where communication takes place without the need for the transportation of physical energy thus interaction can occur instantaneously regardless of distance and time Coherence and consciousness are the bases of Laszlo's Akashic field He proposed a system theoretic paradigm which focuses on a general understanding of the cosmos and the implications for entities such as human beings This entails the observation and explanation of human and cosmic evolution as viewed in unity or inter connectedness where macro and micro are essentially interlinked Laszlo's philosophical work extends to sociology when describing concurrent worldwide issues closely related to the existence of the Akashic Field His humanist ideals are evidenced by his efforts to help humans understand the context and causes for their recent challenges and the possibilities that may lie ahead Ervin Laszlo's half century of exceptional philosophical work gives us the most coherent picture of the nature of the world to date **Interpretation of Law in the Global World: From Particularism to a Universal Approach** Joanna Jemielniak, Przemyslaw
