The Lee Grant Tanks In British Service Osprey Vanguard 6:

Allied Tanks at El Alamein 1942 William E. Hiestand, 2023-07-20 Examines Eighth Army's 1 000 strong tank force rebuilt reorganized and equipped with brand new Sherman and Churchill tanks that secured victory at the Second Battle of El Alamein When Eighth Army retired into the defensive line at El Alamein on 30 June 1942 it was tired dispirited and had lost almost all its tanks during a string of defeats at Gazala Tobruk and Mersa Matruh After savage defensive fighting at First Alamein the reinforced Desert Rats defeated Rommel's last offensive in a tank to tank clash at Alam Halfa in September The next month a completely rebuilt and reorganized Eighth Army equipped with over 1 000 tanks including the American M4 Sherman launched the offensive that would finally drive Rommel out of Africa Montgomery shaped the Eighth Army according to his own military ideas and on 23 October was able to attack the Axis defenses with the largest force of armoured divisions in its history with the 1st 8th and 10th united in a new corps de chasse intended to defeat the Afrika Korps at its own game and the 7th and two infantry support tank brigades assigned to support the XXX and XIII Corps With the exception of the A9 10 and 13 cruisers of 1940 41 as the offensive began the Eighth Army contained every type of tank employed during the North Africa campaign Using detailed illustrations of the tanks involved with an analysis of the tactics employed for battle this is a focused examination of the tank forces that won the Second Battle of El Alamein the most famous British Army victory of World War II and one of the turning points of the war

Tank Gun Systems William Andrews, 2023-06-30 Much has been written about the use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system

Soviet Lend-Lease Tanks of World War II Steven J. Zaloga, 2017-06-29 The Red Army suffered such catastrophic losses of armour in the summer of 1941 that they begged Britain and the United States to send tanks The first batches arrived in late 1941 just in time to take part in the defence of Moscow The supplies of British tanks encompassed a very wide range of types including the Matilda Churchill and Valentine and even a few Tetrarch airborne tanks American tanks included the M3 Stuart light tank and M3 Lee medium

tank and the M4 Sherman tank which became so common in 1944 45 that entire Soviet tank corps were equipped with the type With these Western tanks the Soviets were finally able to beat back the German tide in the East This study examines the different types of tanks shipped to the Soviet Union during the war Soviet assessments of their merits and problems and combat accounts of their use in Soviet service using full colour artwork contemporary photographs and detailed cut away illustrations *The Lee / Grant Tanks in British Service* Bryan Perrett,1978-06-15 This book explores the design development and operation of Lee and Grant tanks in service with the British army up to and including their service in Burma The experiences of tank crewmen are also covered *Whitaker's Cumulative Book List* ,1978 *The British Library General Catalogue of Printed Books 1976 to 1982* British Library,1983 **British Books in Print** ,1985 *The British National Bibliography* Arthur James Wells,2006 **War Monthly** ,1979 *Bookseller and the Stationery Trades' Journal* ,1978 *Wojskowy przegląd historyczny* ,1980 *Armies & Weapons* ,1980 *The Bookseller* ,1980 *M3 Lee/Grant Medium Tank 1941-45* Steven J. Zaloga,2005-08-10 The highly successful stop gap M3 medium tank was designed in 1941 and as adequate turret casting facilities were not yet ready the M3 used an unusual armament configuration patterned after a French tank British lend lease demands led to the design of a second turret type with the US version called the Lee and the British version the Grant It could penetrate Panzer armor and its explosive firepower was excellent for dealing with German anti tank guns This book covers the design development service and variants of a vehicle that was the backbone of many World War II forces **British Light Tanks 1927-45** David Fletcher,2014-12-20 This is the definitive study of British light tanks of the Second World War The author draws upon a vast and comprehensive body of archival information and research to explore their technical characteristics and combat performance The title focuses largely on the very widely used Mark VI but also covers all the variants that preceded it The type was truly ubiquitous equipping the British Army in France the Western Desert regions Norway Sumatra Persia and India This book chronicles various experiments and improvisations carried out on the design of these tanks It ends with coverage of the final model the Mark VIC and details of the experimental Lloyd airborne light tank of 1942 which has a number of features in common with the better known Vickers Armstrongs designs Augmented by original photographs and technical drawings this title is essential for anybody interested in the development of British armoured vehicles *Tanks in Detail* Terry Gander,2003 Although the Medium Tank M3 series was regarded from the outset as an interim vehicle until something better arrived it was produced in thousands and managed to serve many users reliably and well until 1945 and even after The main 75mm gun helped considerably to turn the North African desert campaigns in the Allies favour and although withdrawn from front line service as soon as better combat vehicles became available the basic design of the M3 proved highly adaptable for many other armoured warfare roles from armoured recovery to self propelled artillery Although something of an Ugly Duckling in tank design terms the M3 series proved to be highly significant and successful combat vehicles Book jacket **British Tank Crewman 1939-45** Neil

Grant,2017-11-21 A detailed account of the background and combat experience of the British tank crewman of World War II
M3 Lee/Grant US Medium Tank Luca Stefano Cristini,2024 Officially designated as the Medium Tank M3 was the first US medium tank to be mass produced It was conceived and designed around 1940 and became operational in 1941 Its turret was made in two variants one according to US specifications and the other modified to meet British requirements in this case including the placement of the radio next to the commander In the context of the British Commonwealth the tank acquired two distinct designations those with US model turrets were called Lee in homage to Confederate General Robert E Lee while those with British model turrets were identified as Grant in honor of Union General Ulysses S Grant the two greatest and most famous American generals of the Civil War **Royal Armoured Corps Weapons** ,1943 **US Light Tanks 1944-84**
