Using Political Ideas is a unique blend of political philosophy political theory and history of political thought It combines a critique of the major ideologies of recent and contemporary society with an analysis of the ideas that form the very stuff of political debate By exposing the interplay between ideas and ideologies it shows why political opponents often speak at cross purposes and why rational agreement is so hard to achieve in politics The sixth edition of this well respected and widely known text will be welcomed by those interested in questions such as Is equality more important than personal freedom Does the majority have the right to dictate to the minority in multicultural society Is nationalism a progressive force in the world Politics does not stand still there are always new controversies and ideological conflicts and the climate of discussion changes The 6th edition of this best selling book is fully updated and includes a new chapter on authoritarian ideologies to reflect the growing extreme right wing politics in parts of Europe This edition also provides a variety of new learning features a comprehensive glossary detailed lists of further reading and a list of questions for discussion *Killing Strangers*

Rubenstein, 2017-01-06 This book analyses how certain types of social systems generate violent conflict and

discusses how these systems can be transformed in order to create the conditions for positive peace

Resolving Structural Conflicts addresses a key issue in the field of conflict studies what to do about violent conflicts that are not the results of misunderstanding prejudice or malice but the products of a social system that generates violent conflict as part of its normal operations This question poses enormous challenges to those interested in conflict resolution since the solution to this problem involves restructuring social political and cultural systems rather than just calling in a mediator to help people arrive at an agreement This study breaks new ground in showing how local conflicts involving crime police and prisons transnational conflicts involving religious terrorism by groups like ISIS and international conflicts involving Great Power clashes are all produced in large part by elite driven exploitative or oppressive social structures It also presents new ideas about the implications of this structural turn for the practice of conflict resolution emphasizing the need for conflict resolvers to embrace a new politics and to broaden their methods far beyond traditional forms of facilitation Written by a leading scholar this book will be of much interest to students of conflict resolution peace studies war and conflict studies sociology political science and international relations in general *Liberalism and its Critics* Kirk F. Koerner, 2019-11-21 First published in 1985 Liberalism was under increasing attack from both socialists and conservatives towards the end of the twentieth century This book argues that far from having little to contribute towards solving the problems of the modern world liberalism is in fact of central importance It discusses the arguments against liberalism put forward by four major political theorists refuting the general thrust of their criticisms and taking issue with many points of detail used by them to support their arguments It analyses the origins of liberalism discusses its major achievements and explains why it continues to be a crucially important movement **Karl Marx and the World Socialist Panorama** Louis Patsouras, 2022-01-26 This work on socialism and its near variants is a comprehensive study of its history from the Old Stone Age to the present employing the disciplines of history economics anthropology sociology and psychology This work features mainly the thought of Karl Marx and Fredrick Engels but it does not neglect other socialists and anarchists including Plato Pierre Joseph Proudhon Michael Bakunin Peter Kropotkin V I Lenin Thorstein Veblen Jean Paul Sartre and many others Through the work Patsouras examines prominent socialist thinkers within the world s great religions placing emphasis on Jesus of Nazareth who expressed the wishes of the oppressed poor to rid themselves of their rulers and usher in a society of equality and prosperity The work sketches the class struggles of the peasants in Europe in the late middle Ages and Early Modern Times as well as the great Taiping Rebellion in China Patsouras examines and compares socialism in the U S Western Europe Russia and China Attention is also paid to Russia the former Soviet Union and China and their socialist and near socialist systems inspired by Marx as well as the changing composition of the working classes throughout the world and their efforts to survive and prosper in a capitalist hegemony Marx in Context Louis Patsouras, 2005-04 Since their first collaborative appearance in the mid 1840s Marx and Engles have become central players in the western intellectual tradition They have

inspired two significant Communist revolutions of the 20th century the Russian and Chinese Marx in Context delineates the principal ideas of Marx and Engels as it pertains to such subjects as human exploitation alienation the sufferings of the 19 century working class in England and their human condition imperialism the women s question and religion Marx s ideas are discussed in precise detail with other socialist and conservative thinkers including classical English economist Adam Smith Thomas Robert Malthus David Ricardo anarchists Pierre Joseph Proudhon Michael Bakunin and Peter Kropotkin also included are Max Weber V I Lenin Thorstein Veblen Vilfredo Pareto William Graham Sumner Jean Paul Sartre Simone Weil Paul Tillich Carl Barth Walter Rauchenbusch Gustavo Gutierrez Harry Braverman and other significant thinkers who together help produce the necessary contrast that brings the ideas of Marx and Engels alive Being the first work to depict the similarities and differences of Marx and Engles with other prominent thinkers Marx in Context seeks to reaffirm the purpose behind their vision World Civilization Robin W. Winks,1993-05 Robin W Winks placed particular emphasis on those developments that most directly explain the nature of the modern world social diffusion group and national consciousness technological change religious identities those aspects of intellectual history that have contributed most to our current dilemmas In turn this means that there is more in World Civilization A Brief History about nationalism imperialism or ethnic identities than there is about monarchies feudalism or diplomacy The result of the strategic and intellectual decisions made with respect to this textbook is that its proportions are not the customary ones Particular emphasis is placed on the early origins of civilizations on Greece and Rome and on the period of the so called barbarian invasions because it is by studying these periods that students may best learn how societies are formed Particular emphasis is also placed on the period from the French Revolution on for it is the events of the last two hundred years that have most closely shaped our present condition This book can be read straight through and in its entirety as an interpretive statement about Western history written by a person who knew a good bit about non Western history and who could thus throw into perspective the unusual the commonplace and the comparable in that sector of history conventionally labeled Western The text draws on over thirty five years of discovering in the classroom what students themselves wish to ask about the past rather than what a body of scholars may have concluded they should wish to ask Though this book is largely about Western civilization it is also about world civilizations for from the eighteenth century forward and in many aspects of life much earlier the non West has interacted with the West in such a way as to make it virtually impossible to separate one from the other when dealing at this level of generalization As a teacher of the history of exploration and discovery of imperialism and decolonizati **Routledge**
