The Biology of African Savannahs Bryan Shorrocks, 2007-08-30 Savannah habitats comprise an ecologically important but ultimately fragile ecosystem. They constitute one of the largest biomes on Earth covering about twenty percent of the land surface and can be simply described as tropical and subtropical grasslands with scattered bushes and trees. Most savannahs occur in Africa with a smaller amount in South America, India, and Australia, which is the region that this book concentrates on. Savannahs form a rich mosaic of diverse ecosystems and *The Biology of African Savannahs* offers a concise but comprehensive introduction to their ecology. It describes the major plants, grasses, and trees such as Acacia and animals, mainly large mammals that live in this habitat, and examines the biological and ecological factors that influence their population size, interactions such as predation, and community composition. Conservation issues such as climate change, hunting, and conflict between wildlife and domestic animals are also discussed. This accessible text is suitable for both senior undergraduate and graduate students taking courses in savannah and tropical ecology as part of a wider ecology and/or conservation biology degree programme. It will also be of relevance and use to the many professional ecologists and conservation practitioners requiring a concise but authoritative overview of the topic.

Quest for the African Dinosaurs Louis Jacobs, 2000-08-28 The story of one paleontologist's fossil digs in Africa and his unexpected findings. Winner of the Colbert Award for the best adult book about dinosaurs. Winner of the Colbert Award for the best adult book about dinosaurs. Louis Jacobs reopened paleontologists' eyes to the African continent when he uncovered a major fossil site in the hills of Malawi in the 1980s. During five digging seasons in Malawi and three in Cameroon, Jacobs found the remains of two meat-eating theropods, two herbivorous sauropods, an odd crocodile about the size of a Chihuahua, and rare early mammals. Now in paperback, *Quest for the African Dinosaurs* includes Jacobs' new introduction which discusses recent developments in paleontological research in Africa.

Black Women's Literature of the Americas Tonia Leigh Wind, 2021-11-25 Drawing on a range of historical and literary texts, this book examines how Black women under the yoke of slavery negotiated their sense of belonging and spirituality from a liminal position, stuck between a new life in the Americas and their connections to their African ancestral roots and a wider diasporic community. The book investigates how Black women in the Spanish-speaking Caribbean, the United States, and Brazil turned to their spiritual beliefs as a tool of resilience and resistance. These griots and goddesses are forced to negotiate complex issues such as race, gender, identity, maternity, sexuality, and belonging from a liminal position that looks to both settle roots in a foreign land and stay connected to ancestors and the Sacred. As these Black female protagonists turn to re-memory and ancestral knowledge to map their connection with the Divine, they become mediators of worlds and hybrid griots surpassing temporal and geographical boundaries. With important reflections on Toni Morrison's *Beloved*, Dahlma Llanos Figueroa's *Daughters of the Stone*, and Ana Maria Gonçalves's *Um Defeito de Cor* amongst other texts, this book will be of interest to

advanced students and researchers of comparative literature religious studies gender studies and African diaspora studies
