The Hanford Reach A Land Of Contrasts Desert Places:

The Hanford Reach Stamford D. Smith, 2004 The desert country along the Columbia River is one of the West's least known desert places one that most people don't even drive through unless they are unusually curious travelers The Hanford Reach is the last free stretch of the river between the McNary and Priest Rapids Dams a place boasting a varied landscape of floodplains wetlands deserts orchards and nuclear reactors This is not a place that people think to visit Known primarily for hosting the country's most toxic nuclear outpost it is public land that barely exists in public consciousness But because the Reach has been posted off limits by the military since 1943 this book offers readers a little seen glimpse into what the Pacific Northwest's arid east was like before the postwar boom Susan Zwinger has kayaked the Columbia through Hanford Reach with scientists and activists who are helping to restore it and in this book she outlines the geographical extent of the Reach reviews its history and takes readers through the terrain by foot on road and on the river Here is a land of dark lava flows and basalt cliffs interspersed throughout subtle pale shrub steppe a table of aridity cut through by one of the country's most prodigious rivers Zwinger's sparkling text enhanced by Skip Smith's striking photos captures the subtleties of the contrasting vistas just as it makes clear the depth of the radioactive poisoning within the soil and wildlife We have only just begun to unfold the land's treasures petroglyphs ancient village sites new species and geological wonders and in 2000 President Clinton protected 560 square miles of land as the Hanford Reach National Monument This book celebrates what is preserved in that buffer zone at the dawn of a new era of environmental responsibility
