Nomination of Louis W. Sullivan United States. Congress. Senate. Committee on Finance,1989 Current Catalog National Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965 70 Bibliography of the History of Medicine ,1984 **Let Me Heal** Kenneth M. Ludmerer,2014-09-01 In Let Me Heal prize winning author Kenneth M Ludmerer provides the first ever account of the residency system for training doctors in the United States He traces its development from its nineteenth century roots through its present day struggles to cope with new bureaucratic work hour regulations for house officers and more important to preserve excellence in medical training amid a highly commercialized health care system Let Me Heal provides a highly engaging richly contextualized account of the residency system in all its dimensions It also brilliantly analyzes the mutual relationship between residency education and patient care in America The book shows that the quality of residency training ultimately depends on the quality of patient care that residents observe but that there is much that residency training can do to produce doctors who practice in a better more affordable fashion Let Me Heal is both a stunning work of scholarship and a highly engaging account of how one becomes a doctor in the United States

It is indispensable reading for those who wish to understand what it means to learn and practice medicine and what is needed to make medical education and patient care in America better. The definitive work on the subject it is destined to become a classic that will be consulted by readers far into the future. Clinical Approach to Infection in the Compromised Host Robert H. Adam Gopnik, Embryonic stem cell research, Evolution vs intelligent design, The transformation of medicine into health care, Climate change. Never before has science been so intertwined with politics; never have we been more dependent on scientific solutions for the preservation of the species. Transporting us across more than four hundred years of pivotal moments in science and medicine, Gerald Weissmann distills history's lessons for today's new age of sect and violence. *The Endarkenment*. Among others, he lingers with Galileo and his daughter in seventeenth-century Florence, Diderot and d'Alembert in Enlightenment Paris, William and Alice James in fin de siècle Boston, James Watson as the John McEnroe of DNA and Craig Venter decoding the genome at the dawn of the twenty-first century. Weissmann's message is clear: Experimental science is our defense, perhaps our best defense against humbug and the Endarkenment. Gerald Weissmann, August 7, 1930–July 10, 2019. He was a physician, scientist, editor and essayist whose collections include *The Fevers of Reason*, *New and Selected Essays*, *Epigenetics in the Age of Twitter*, *Pop Culture and Modern Science*, *Mortal and Immortal*, *DNA Science and the Lure of Myth* and *Galileo's Gout: Science in an Age of Endarkenment*. **Journal of the National Cancer Institute** National Cancer Institute (U.S.), 1975. *Journal* National Cancer Institute (U.S.), 1975. **Breaking Ground** Louis Wade Sullivan, David Chanoff, 2014. While Louis W. Sullivan was a student at Morehouse College, Morehouse president Benjamin Mays said something to the student body that stuck with him for the rest of his life: The tragedy of life is not failing to reach our goals. Mays said: It is not having goals to reach. In *Breaking Ground*, Sullivan recounts his extraordinary life beginning with his childhood in Jim Crow South Georgia and continuing through his trailblazing endeavors: training to become a physician in an almost entirely white environment in the Northeast; founding and then leading the Morehouse School of Medicine in Atlanta; and serving as secretary of Health and Human Services in President George H. W. Bush's administration. Throughout this extraordinary life, Sullivan has passionately championed both improved health care and increased access to medical

professions for the poor and people of color At five years old Louis Sullivan declared to his mother that he wanted to be a doctor Given the harsh segregation in Blakely Georgia and its lack of adequate schools for African Americans at the time his parents sent Louis and his brother Walter to Savannah and later Atlanta where greater educational opportunities existed for blacks After attending Booker T Washington High School and Morehouse College Sullivan went to medical school at Boston University he was the sole African American student in his class He eventually became the chief of hematology there until Hugh Gloster the president of Morehouse College presented him with an opportunity he couldn't refuse Would Sullivan be the founding dean of Morehouse's new medical school He agreed and went on to create a state of the art institution dedicated to helping poor and minority students become doctors During this period he established long lasting relationships with George H W and Barbara Bush that would eventually result in his becoming the secretary of Health and Human Services in 1989 Sullivan details his experiences in Washington dealing with the burgeoning AIDS crisis PETA activists and antismoking efforts along with his efforts to push through comprehensive health care reform decades before the Affordable Care Act Along the way his interactions with a cast of politicians including Thurgood Marshall Jack Kemp Clarence Thomas Jesse Helms and the Bushes capture vividly a particular moment in recent history Sullivan's life from Morehouse to the White House and his ongoing work with medical students in South Africa is the embodiment of the hopes and progress that the civil rights movement fought to achieve His story should inspire future generations of all backgrounds to aspire to great things A Sarah Mills Hodge Fund Publication
