Abstract We investigate the association between the 1996 welfare reform and health insurance, medical care use and health of low-educated, foreign-born, single mothers and their children. We find that welfare reform was associated with an eight to 11.5 percentage points increase in proportion uninsured among low-educated foreign-born, single mothers. We also find that the decline in welfare caseload since 1996 was associated with a 6.5 to 10 percentage points increase in the proportion of low-educated foreign-born, single mothers reporting delays in receiving medical care or receiving no care due to cost and a nine percentage points decline in visits to a health professional in the past 12 months. We do not find any consistent evidence that welfare reform affected the health insurance, medical care utilization and health of children living with single mothers.

Introduction

The 1996 Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) eliminated entitlement to cash assistance, imposed stringent work requirements on welfare recipients, and instituted time-limited benefits. While these changes in policy were striking, legal immigrants faced even more dramatic changes as they were the target of special provisions that eliminated all federal means-

tested benefits to recent immigrants, and denied some benefits to all immigrants. As a result, immigrant use of cash assistance, Medicaid, Food Stamps and Supplemental Security Income has fallen sharply since 1996 [1, 2].

Research suggests that welfare reform has induced foreign-born, single mothers to move from welfare to work in large numbers (Kaestner and Kaushal, 2006) [2]. It also left many immigrant women and children without health insurance [3, 4]. These changes in employment, health insurance coverage and other life circumstances (family income, family structure) have the potential to significantly affect use of medical care and health of low-income immigrants. Increased employment and greater income may positively affect use of health care and health, but loss of health insurance and other changes in the lives of low-income families may adversely affect these outcomes.

To our knowledge, there is no study of the effect of welfare reform on use of medical care and health of low-income immigrant families. This is noteworthy because health is an important determinant of well being and change in health, as a result of welfare reforms, would surely be viewed as a key measure of the success of this policy. Besides if welfare reform affected immigrant health adversely, it may have undermined the policy's intended objectives. Poor health would hinder immigrants' success in the labor market and impede progress toward economic independence. Further, the fiscal benefits of the immigrant provisions of PRWORA are also potentially eroded by the risk of increased health care costs resulting from more low-income immigrant families making use of emergency care that cannot be denied, but that is more expensive than routine preventive care.¹ Thus,

The Impact of Immigration on African Americans Steven Shulman, 2017-09-04 Immigration has significant consequences for all Americans but especially for African Americans The sheer magnitude of immigration it is the primary factor driving population growth is so large that it directly or indirectly affects the economic political social and environmental circumstances of most Americans But the geographic concentration of immigrants in urban areas and the economic concentration of immigrants in the low wage sector of the labor market have special consequences for African Americans since they are especially likely to live in urban areas and to be low wage workers These effects can be both negative and positive Immigration has sharply increased the supply of labor into the low wage sector of the labor market which tends to reduce wages and employment opportunities for low wage native workers Employers may prefer hiring immigrants who are perceived to be hard working and uncomplaining to hiring African Americans Immigrants can also increase the competition for scarce public services especially education on which African Americans depend Yet immigration can also stimulate economic growth and urban revitalization which can increase job opportunities and spread an ideology of multiculturalism Immigration can dilute the political power of African Americans but it can also strengthen the civil rights coalition Immigration can benefit some groups while hurting others This volume presents research and analysis that reflects and advances the debates about the economic and political consequences of immigration for African Americans The contributors include Gerald Jaynes Yale University Vernon Briggs Cornell University Frank Bean and Jennifer Lee University of California Irvine Robert Cherry Brooklyn College Manuel Pastor University of California Santa Cruz and Enrique Marcelli University of Massachusetts Boston Steven Camarota Center for Immigration Studies Frank Morris University of Texas D
