Macroevolution, Contingency, and Divine Activity Bradford McCall, 2023-10-27 What are the things that God values in the creative process How does one define God's activity in such a world How is God's involvement different from a contingent what this author labels contingentist instance Why do we need a God idea at all Herein Bradford McCall addresses how divine amorepotent love works with and within a contingentist i e radically contingent evolutionary theory and worldview Within the course of this project he reaches a via media between the somewhat radical formalist position of Simon Conway Morris and the veritably radical contingent position of Stephen Jay Gould But how is the contingentist amorepotent and uncontrolling love of God understood as purposeful McCall argues in detail that there in fact is some sort of purposiveness that is nevertheless working in a chastened Gouldian position and he distinguishes between contingency and veritable divine involvement He contends that God does not insist upon a particular outcome but merely allows propensities to work themselves out God amorepotently loves the population of the natural world into greater forms of complexity relationality and beauty in varied and multifarious forms along with the extension of diversity Jay Gould Julius Grodinsky, 2015-09-30 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press's distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas **Mystery of Mysteries** Lucyle T Werkmeister Professor of Philosophy and Director of the Program in the History and Philosophy of Science Michael Ruse, Michael Ruse, 2009-06-01 With the recent Sokal hoax the publication of a prominent physicist's pseudo article in a leading journal of cultural studies the status of science moved sharply from debate to dispute Is science objective a disinterested reflection of reality as Karl Popper and his followers believed Or is it subjective a social construction as Thomas Kuhn and his students maintained Into the fray comes Mystery of Mysteries an enlightening inquiry into the nature of science using evolutionary theory as a case study Michael Ruse begins with such colorful luminaries as Erasmus Darwin grandfather of Charles and Julian Huxley brother of novelist Aldous and grandson of T H Huxley Darwin's bulldog and ends with the work of the English game theorist Geoffrey Parker a microevolutionist who made his mark studying the mating strategies of dung flies and the American paleontologist Jack Sepkoski whose computer generated models reconstruct mass extinctions and other macro events in life's history Along the way Ruse considers two

great popularizers of evolution Richard Dawkins and Stephen Jay Gould as well as two leaders in the field of evolutionary studies Richard Lewontin and Edward O Wilson paying close attention to these figures cultural commitments Gould s transplanted Germanic idealism Dawkins s male dominated Oxbridge circle Lewontin s Jewish background and Wilson s southern childhood Ruse explicates the role of metaphor and metavalues in evolutionary thought and draws significant conclusions about the cultural impregnation of science Identifying strengths and weaknesses on both sides of the science wars he demonstrates that a resolution of the objective and subjective debate is nonetheless possible The Independent ,1898 **The Secret Life of Corporations** Mark I.
