Jason, Allan B. Lefcowitz, 2004 This handbook is the perfect reference for beginning creative writers It offers abundant illustrations exercises and useful techniques in all genres While emphasizing problem solving and the mastery of literary conventions this handbook also takes the apprentice writer on a journey from inspiration to revision Explores the work of classic modern as well as active contemporary writers through examples of effective stories essays poems and plays An extensive look at fundamental creative writing issues includes attitudes habits journal keeping point of view language invention and research and more Appropriate for apprentice creative **Under the Sun** Phil Robinson.1882 South Atlantic Review .1995 The Monkey Wars Deborah writers Blum, 1995-12-14 The controversy over the use of primates in research admits of no easy answers We have all benefited from the medical discoveries of primate research vaccines for polio rubella and hepatitis B are just a few But we have also learned more in recent years about how intelligent apes and monkeys really are they can speak to us with sign language they can even play video games and are as obsessed with the games as any human teenager And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers in 1982 a Silver Spring lab was charged with 17 counts of animal cruelty It is a complex issue made more difficult by the combative stance of both researchers and animal activists In The Monkey Wars Deborah Blum gives a human face to this often caustic debate and an all but human face to the subjects of the struggle the chimpanzees and monkeys themselves Blum criss crosses America to show us first hand the issues and personalities involved She offers a wide ranging informative look at animal rights activists now numbering some twelve million from the moderate Animal Welfare Institute to the highly radical Animal Liberation Front a group destructive enough to be placed on the FBI s terrorist list And she interviews a wide variety of researchers many forced to conduct their

work protected by barbed wire and alarm systems men and women for whom death threats and hate mail are common She takes us to Roger Fouts's research center in Ellensburg Washington where we meet five chimpanzees trained in human sign language and we visit LEMSIP a research facility in New York State that has no barbed wire no alarms and no protesters chanting outside because its director Jan Moor Jankowski listens to activists with respect and treats his animals humanely And along the way Blum offers us insights into the many side issues involved the intense battle to win over school kids fought by both sides and the danger of transplanting animal organs into humans As it stands now Blum concludes the research community and its activist critics are like two different nations nations locked in a long bitter seemingly intractable political standoff But if you listen hard there really are people on both sides willing to accept and work within the complex middle When they can be freely heard then we will have progressed to another place beyond this time of hostilities In The Monkey Wars Deborah Blum gives these people their voice Noah's ark; or, 'Mornings in the zoo'.
