

THE LAZARUS EXPEDITION [CONTINUED]

- ▶ After Lazarus Base was established the Lazarus fleet moved on, their intended course was towards the center of the galaxy but they never encountered the borders of the Tanoch Empire.

The last orders from Admiral Sirocco Manaan, commanding officer of the Lazarus expedition, was that he was going to find if Nimbus had a gate network core similar to the Eye of Aarran.

Woody's Last Laugh James Christopher Haney, 2021-11-26

When I was appointed Co chair of the U.S. Fish and Wildlife Service team charged with preparing a preliminary recovery plan for the Ivory billed Woodpecker, I had naive notions about the work ahead. Dr. Haney's book would have been an immense help in navigating the many strange behaviors, misconceptions, and bitter disagreements that ensued. Woody's Last Laugh reveals that I too fell to faulty thinking about the Ivory bill and the question of its continued existence or extinction. I highly recommend this book for anyone involved in endangered species recovery as a way to avoid the many cognitive biases that we all face.

Jon Andrew Co chair of Ivory billed Woodpecker Recovery Team retired. Woody's Last Laugh explores a simmering controversy amid scientists, conservationists, birders, and the media: the supposed extinction of American ivory billed woodpecker. Among the first to identify rampant mental errors inside conservation and environmental professions, the book identifies 53 distinct kinds of cognitive blunders, psychological biases, and logical fallacies on both sides of the woodpecker controversy. Few species have ever provoked such social rancor. Why are rumors of its persistence so prevalent unlike other near or recently extinct animals? Why are we so bad mannered with each other about a mere bird? How is it that we cannot agree even on whether a mere bird is alive or dead? Woody's Last Laugh uncovers why such mysteries so mess with our heads. By exploring uncharted borders between conservation and mental perception, new ways of evaluating truth and accuracy are opened to everyone.

Author Dr. J. Christopher Haney is a biologist, conservation scientist, and lifelong birder. For 12 years he was Chief Scientist at Defenders of Wildlife. In 2010, following the Deepwater Horizon oil blowout, the U.S. Fish Wildlife Service invited him to lead the largest pelagic study of marine birds ever conducted in the Gulf of Mexico. Since 2013 he has been president of Terra Mar Applied Sciences, an independent public interest conservation research firm which he founded. If there is one lesson Dr. Haney hopes his book delivers, it is to not overvalue our thinking skills. Human reason is fallible even among scientists and technical experts. To improve our essential relationship with nature, conservation practices will need to devote as much attention to the unbridled thoughts as the unswerving sentiments. Dead or alive, however, the ivory bill got the last laugh on us all.
