Finding a Place to Stand Edward R Shapiro,2020-04-29 What stands between us and authoritarianism seems increasingly fragile Democratic

practices are under attack by foreign intrusion into elections voter suppression restricts citizen participation Nations are turning to autocratic leaders in the face of rapid social change Democratic values and open society can only be preserved if citizens can discover and claim their voices We access society through our organisations yet the collective voices and irrationalities of these organisations do not currently offer clear pathways for individuals to locate themselves How can we move through the mounting chaos of our social systems through our multiple roles in groups and institutions to find a voice that matters What kind of perspective will allow institutional leaders to facilitate the discovery of active citizenship and support engagement This book draws on psychodynamic systems thinking to offer a new understanding of the journey from being an individual to joining society as a citizen With detailed stories the steps and the conscious and unconscious linkages from being a family member to entering outside groups to taking up and making sense of institutional roles illuminate the process of claiming the citizen role With the help of leaders who recognise and utilise the dynamics of social systems there may be hope for us as citizens to use our institutional experiences to discover a place to stand **Communicative**

Practices at Work Jo Anne Kleifgen, 2013-10-28 This book examines communicative practices in a circuit board manufacturing plant in California s Silicon Valley where the employees come from diverse ethnolinguistic backgrounds their activities involve the use of high tech equipment and their practices are shaped by and sometimes contest local and global forces Analyses of the data show that learning occurs optimally when workers make strategic use of both their home languages and English within an ecology of semiotic systems The book demonstrates the importance of accounting for multilingual practices in studies of multimodality Through detailed ethnography it brings the reader to a better understanding of learning in practice in work environments where the complexities and accelerated growth of new technologies along with a globalized world produce new forms of multilingual and multimodal communication *Leveraging Communities of Practice for Strategic Advantage* Hubert Saint-Onge, Debra Wallace, 2012-07-26 How can you build a successful community of practice that is integrally linked to your company s strategic vision Learn from the first hand experience of Hubert Saint Onge recognized by Fortune magazine as a leader in the field of knowledge capital and co author Debra Wallace the people responsible for a recent project to establish a community of practice for independent agents at Clarica Life Insurance Company voted one of the most admired knowledge enterprises in the world by practitioners and researchers *Leveraging Communities of Practice for Strategic Advantage* combines theory and practice to outline a model for developing successful communities of practice and proposes a direction for establishing communities of practice as an integral part of the organizational structure Saint Onge and Wallace relate what worked what didn t and why as they tell the story from inception through implementation to assessment Whether you re developing communities of practice or want to learn how to leverage existing communities for strategic gain this book provides you with everything you need to launch successful communities of practice in your organization The Professoriate Anthony Welch, 2005-08-31 What does it mean

to be an academic in the twenty first century Clearly there is no one answer to this question as the diversity evident in the following chapters reveals Elite research universities often tend to join with others of their kind so that a professor from an elite US institution may well undertake a Japanese sabbatical if at all at the University of Tokyo a UK semester at Oxford or Cambridge or an Australian semester at the University of Sydney or perhaps Melbourne At each they can expect to have at their disposal well stocked libraries replete with requisite books journals and databases many now available electronically as well as highly regarded specialist peers in their research areas with whom they can discuss their work in detail How can this academic lifeworld be compared with that of a member of the South East Asian professoriate for example or many in Latin America and Africa where inadequate wages often necessitate taking on a second job often at a lower quality private institution which however likely offers better remuneration and or perhaps conducting a small business on the side Welch 2003 Tipton Jarvis and Welch 2003 and where the lack of basic infrastructure as well as research training means that teaching and perhaps some administration is perhaps the limit of one s activities The story of differentiation however is not limited to differences between elite institutions in OECD countries and more modest institutions elsewhere
