Logan, 1990-07-26 American prisons and jails are overflowing with inmates To relieve the pressure courts have imposed fines on overcrowded facilities and fiscally strapped governments have been forced to release numerous prisoners prematurely In this study noted criminologist Charles Logan makes the case for commercial operation of prisons and jails as an alternative to the government s monopoly On philosophical economic legal and practical grounds Logan argues a compelling case for the private and commercial operation of prisons He critically examines all objections raised by

opponents and concludes that while private prisons face many potential problems they do so primarily because they are prisons not because they are private Historically the record of private ownership and operation of corrections facilities has been bleak ridden with political corruption physical abuse of prisoners and the single minded pursuit of profits This study demonstrates that this need not be the case Critiquing the tendency to contrast private prisons with a hypothetical ideal Logan instead compares them with existing public institutions arguing that the potential problems attributed to private prisons are experienced by their public counterparts The work examines ten sets of issues including the propriety cost security and quantity of prisons to set out a strong case for the viability of proprietary prisons Legal Aspects of Corrections Management Clair A. Private Prisons United States. General Accounting Office, 1991 *The Handbook of Crime and Punishment* Michael Tonry, 2000-11-09 Crime is one of the most significant political issues in contemporary American society Crime control statistics and punishment policies are subjects of constant partisan debate while the media presents sensationalized stories of criminal activity and over crowded prisons In the highly politicized arena of crime and justice empirical data and reasoned analysis are often overlooked or ignored The Handbook of Crime and Punishment however provides a comprehensive overview of criminal justice criminology and crime control policy thus enabling a fundamental understanding of crime and punishment essential to an informed public Expansive in its coverage the Handbook presents materials on crime and punishment trends as well as timely policy issues The latest research on the demography of crime race gender drug use is included and weighty current problems organized crime white collar crime family violence sex offenders youth gangs drug abuse policy are examined Processes and institutions that deal with accused and convicted criminals and techniques of punishment are also examined While some articles emphasize American research findings and developments others incorporate international

research and offer a comparative perspective from other English speaking countries and Western Europe Editor Michael Tonry a leading scholar of criminology introduces the 28 articles in the volume each contributed by an expert in the field Designed for a wide audience The Handbook is encyclopedic in its range and depth of content yet is written in an accessible style The most inclusive and authoritative work on the topic to be found in one volume this book will appeal to those interested in the study of crime and its causes effects trends and institutions those interested in the forms and philosophies of punishment and those interested in crime control **Privatizing Correctional Institutions** Gary W.

Bowman,2023-04-14 With more than one million people behind bars the United States imprisons a larger share of its population than any other industrialized nation This has precipitated a serious overcrowding problem with federal and state prisons currently operating well beyond capacity Conventional efforts appear unable to cope with the increasing shortage of beds or with inadequate rehabilitation services A bold solution is required increasingly it is being seen to reside in the private sector This timely volume explores the issues of private versus public financing construction and management of medium and high security prisons Private prisons are not a new concept in the United States They have existed in several forms since the eighteenth century The opening chapters evaluate historical cases of prisons for profit examining the concerns of labor abuses of inmates and the source and resolution of disputes between private and public sectors These chapters argue that the experience gained through privatization does not justify current opposition from civil libertarians or labor unions Chapters dealing with the modern contracting out of complete management and limited services document the growing trend toward privatization and instances of public private partnership in prison industries The assembled evidence indicates clearly that privately run prisons have shown significant cost savings and good quality of provision for prisoners while still being profitable However the authors caution that these promising results must be reinforced by public safeguards in the contracting stage and monitoring to assure good service and security With the American prison system in disarray the public interest demands that government look beyond the public or private identity of those who wish to provide correctional services and focus instead on who can provide the best services at a given cost It is essential to state that correctional services should attain several objectives and not merely cost minimization The analysis and recommendations presented here will aid in the task Privatizing Correctional Institutions will be of interest to law enforcement officials public policy analysts penologists and criminologists **Privatization Bibliography** ,1989 **Private Security, Public Order** Simon

Privatising Criminal Justice Christopher Hamerton, Sue Hobbs, 2022-09-30 Privatising Criminal Justice explores the social cultural and political context of privatisation in the criminal justice sector In recent years the criminal justice sector has made various strategic partnerships with the private sector exemplified by initiatives within the police the prison system and offender services This has seen unprecedented growth in the past 30 years and a veritable explosion under the tenure of the coalition government in the UK This book highlights key areas of domestic and global concern and illustrates with detailed case studies of important developments It connects the study of criminology and criminal justice to the wider study of public policy government institutions and political decision making In doing so Privatising Criminal Justice provides a theoretical and practical framework for evaluating collaborative public and private sector response to social problems at the beginning of the twenty first century An accessible and compelling read this book will appeal to students and scholars of criminology criminal justice sociology and politics and all those interested in how privatisation has shaped the contemporary criminal justice system

Harsh Justice James Q. Whitman, 2005-04-14 Criminal punishment in America is harsh and degrading more so than anywhere else in the liberal west Executions and long prison terms are commonplace in America Countries like France and Germany by contrast are systematically mild European offenders are rarely sent to prison and when they are they serve far shorter terms than their American counterparts Why is America so comparatively harsh In this novel work of comparative legal history James Whitman argues that the answer lies in America's triumphant embrace of a non hierarchical social system and distrust of state power which have contributed to a law of punishment that is more willing to degrade offenders

The American Prison Francis T. Cullen, Mary K. Stohr, 2014 For the first time in four decades prison populations are declining and politicians have reached the consensus that mass imprisonment is no longer sustainable At this unique moment in the history of corrections the opportunity has emerged to discuss in meaningful ways how best to shape efforts to control crime and to intervene effectively with offenders

The American Prison Imagining a Different Future by Francis T Cullen Cheryl Lero Johnson and Mary K Stohr pulls together established correctional scholars to imagine what this prison future might entail Each scholar uses his or her expertise to craft in an accessible way for students to read a blueprint for how to create a new penology along a particular theme For example one contributor writes about how to use existing research expertise to create a prison that is therapeutic and another provides insight on how to create a feminist prison In the final chapter the editors

Likosky,2018-01-18 Michael Likosky examines the continuities and discontinuities between colonial and present day high tech transnational legal orders His concern is specifically with the colonial characteristics of the legal order which underpins the global high tech economy He distinguishes the democratic and human rights rhetoric of this economy from a reality wherein the legal order is often used to reproduce colonial type relationships Just as in the colonial period the expansion of trans border commerce overlaps with democratic demands and human rights in complex multifaceted and paradoxical ways Through a case study looking at Malaysia s Multimedia Super Corridor a high tech national development plan and foreign direct investment scheme he examines how the transnational leaders of the high tech economy along with the Malaysian political elite react when human rights problems threaten to derail commercial plans **Handbook of Critical Criminology** Walter S.
