The Limits Of Love:

The Limits of Love Rajiva Wijesinha, 2005 *The Limits of Love* Michael Squires, 2024

The Limits of Love The Lives of D H Lawrence and Frieda von Richthofen provides a candid look at two illustrious people who tested the capacity and the limits of marriage The Lawrences come alive not as simple quarreling travelers nor as blissful domestic partners but as complex personalities who experimented with marriage to see if it would fulfill their needs Their antagonisms and their sexual experiences informed Lawrence's fearless novels *The Rainbow* and *Women in Love* Both works also tested the boundaries of public taste and faced harsh receptions The cost of the Lawrences strong but unstable marriage was high Despite periods of happiness and peace angry clashes meant separations and uneasy agreements to repair the marital intimacy when it cracked Fractures of 1916 1919 1923 and 1926 healed slowly and with difficulty In Lawrence's most calculated and famous work *Lady Chatterley's Lover* he successfully coded their marital stress and full of rage fused two stories of failed marriages Drawing on many unpublished and recently discovered letters *The Limits of Love* offers readers a detailed reconstruction of two complicated lives written with narrative speed and a forceful style filled with vivid interpretations of Lawrence's work and conveying deep sympathy for people living outside established norms This new dual biography based on years of research by Michael Squires captures the essence of Lawrence and Frieda making the couple real alive and accessible

The Limits of Love Frederic Raphael, 1961 *On Feminine Sexuality the Limits of Love and Knowledge* Jacques Lacan, 1999-11-23 In his psycholinguistic exploration of the relationship between the desire for love and the attainment of knowledge Jacques Lacan leads into a new way of interpreting the two most fundamental human drives *Limits of Love* Gilbert Meilaender, 2010-11-01 Reflecting upon some problems of the moral life Gilbert Meilaender considers their difficulties within a vision that accentuates not only the limits but also the promise of the Christian story Created by God as finite beings we make particular attachments Redeemed by God for a community transcending nature and history our love always carries us beyond the special bonds of time and place We live therefore with a sense of permanent tension If this tension heightens our sense of the perplexities of life it should not free us from the obligation to probe clarify and where we can resolve some of those difficulties The author holds that theological ethics must clarify the direction for growth and development within the Christian life He undertakes such analysis emphasizing throughout the limits of the human condition the importance of our nature as embodied persons and the danger and pretension in some of our attempts to take control of and master human life This Christian vision is developed in chapters that explore a range of moral problems such as abortion artificial reproduction euthanasia care for defective infants provision of artificial nutrition and hydration and marital and political community These are throughout however theological explorations Taken together they illumine not only particular problems of the moral life but a vision of life classically Christian in its conception humane in its care for particular bonds of attachment and modest in its recognition of moral limits on our ability to seek the good Meilaender has developed a broad recognition both among

scholars and students of ethics and among interested general readers He has the capacity to throw fresh angles of vision on complex problems so as to help both the sophisticated and the uninitiated reader to think more penetratingly about moral questions
