Sky Ships A History Of The Airship In The United States Navy:

Sky Ships William F Althoff,2016-02-15 Originally published in 1990 *Sky Ships* is easily the most comprehensive history of U S Navy airships ever written The Naval Institute Press is releasing this new edition complete with two hundred new photographs to commemorate the twenty fifth anniversary of the book s publication Impressed by Germany s commercial and military Zeppelins the United States initiated its own airship program in 1915 Naval Air Station Lakehurst in New Jersey was homeport for several of the largest machines ever to navigate the air The success of the commercial rigid airship peaked in 1936 with transatlantic round trips between Central Europe and the Americas by Hindenburg and by Graf Zeppelin ending with the infamous fire in 1937 That setback the onset of war and the accelerated progress of heavier than air technology ended rigid airship development The Navy continued to use blimps to protect Allied shipping during World War II Following the war the Navy persisted with efforts to integrate the airships but the program was finally discontinued in the early 1960s

Rear Admiral Herbert V. Wiley Ernest Marshall,2018-09-25 This book is simultaneously a biography of Admiral Herbert Victor Wiley and a history of the U S Navy s lighter than air program As tensions rose between Japan and the U S over control of East Asia and the Pacific Ocean the prospects of war between the two nations increased The Navy tracked the Germans use of zeppelins during the First World War and saw in them an aircraft with the potential to conduct long range reconnaissance over the oceans something that could not be achieved by airplanes or surface ships While rapid progress was being made in manned flight it was still young enough that the future of LTA vs HTA flight was unknown At the time however airships had a much greater range than airplanes making them suitable for reconnaissance In its history the Navy had four great airships the U S S Shenandoah the U S S Los Angeles the U S S Akron and the U S S Macon Wiley served on all four of these airships and the history of these vessels is covered through the career of Wiley Three of the airships ended in disaster and Wiley survived the crash of two of them The book explores in detail the events leading to the crash of each airship through examination of the records of the Navy s Courts of Inquiry that investigated the cause of each crash The book also tracks issues surrounding the use of non flammable helium as a lifting gas instead of highly explosive hydrogen used by the Germans The U S had a monopoly on the supply of helium While Germany sought to purchase helium from the U S the government board governing the sale of helium blocked its availability to Germany on the basis it might be used for wartime purposes Dr Hugo Eckener had run the Zeppelin works in Friedrichshaven since the end of WWI and he had a vision for LTA flight that was peaceful including international transoceanic passenger and freight services The outbreak of WW II ended the zeppeling industry and dashed all of Eckener s dreams Following the crash of the Macon Wiley returned to the surface fleet eventually becoming Commander of Destroyer Squadron 29 in the Asiatic Fleet shortly before the bombing of Pearl Harbor

United States Naval Aviation, 1919-1941 E.R. Johnson,2014-01-10 Within six months of the devastating attack on Pearl Harbor the U S Navy had checked the Japanese military advance in the Pacific to the extent that the United States

could return to its original Defeat Germany First strategy That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1 000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation This thorough study with detailed drawings and photographs explains and illustrates the trial and error process which went into developing the aircraft airships and ships of the interwar period The critical factors that shaped Naval Aviation after World War I naval treaties fleet tactics government programs leadership and organization as well as the emergence of Marine Corps and Coast Guard aviation are discussed in depth Airships Iver P. Cooper,2025-05-16 Many people may know about the blazing crash of the Hindenburg in 1937 but are possibly unaware that it had made 62 flights before its final journey including one transporting author Leslie Charteris creator of The Saint The disaster however did not end the airship era blimps escorted convoys during World War II and were a part of air defense systems in the 1950s and 1960s Airships still fly today and new models are in the construction phase This book examines this branch of aviation history delving into the science and engineering of airships and their design flaws weather difficulties and operational errors The chapters focus on function lift propulsion materials ground handling and so forth The book concludes with speculations about future airship designs and missions International Encyclopedia of Military History James C. Bradford,2004-12 With its impressive breadth of coverage both geographically and chronologically the International Encyclopedia of Military History is the most up to date and inclusive A Z resource on military history From uniforms and military insignia worn by combatants to the brilliant military leaders and tacticians who commanded them the campaigns and wars to the weapons and equipment used in them this international and multi cultural two volume set is an accessible resource combining the latest scholarship in the field with a world perspective on military history *How America Saved the World* Eric Hammel,2009 **Rear Admiral Herbert V. Wiley** Ernest Marshall,2018-09-25 This book is simultaneously a biography of Admiral Herbert Victor Wiley and a history of the U S Navy s lighter than air program As tensions rose between Japan and the U S over control of East Asia and the Pacific Ocean the prospects of war between the two nations increased The Navy tracked the Germans use of zeppelins during the First World War and saw in them an aircraft with the potential to conduct long range reconnaissance over the oceans something that could not be achieved by airplanes or surface ships While rapid progress was being made in manned flight it was still young enough that the future of LTA vs HTA flight was unknown At the time however airships had a much greater range than airplanes making them suitable for reconnaissance In its history the Navy had four great airships the U S S Shenandoah the U S S Los Angeles the U S S Akron and the U S S Macon Wiley served on all four of these airships and the history of these vessels is covered through the career of Wiley Three of the airships ended in disaster and Wiley survived the crash of two of them The book explores in detail the events leading to the crash of each airship through examination of the records of the Navy s Courts of Inquiry that investigated the cause of each crash The book also tracks issues surrounding the use of non flammable helium as a lifting gas

instead of highly explosive hydrogen used by the Germans The U S had a monopoly on the supply of helium While Germany sought to purchase helium from the U S the government board governing the sale of helium blocked its availability to Germany on the basis it might be used for wartime purposes Dr Hugo Eckener had run the Zeppelin works in Friedrichshaven since the end of WWI and he had a vision for LTA flight that was peaceful including international transoceanic passenger and freight services The outbreak of WW II ended the zeppeling industry and dashed all of Eckener's dreams Following the crash of the Macon Wiley returned to the surface fleet eventually becoming Commander of Destroyer Squadron 29 in the Asiatic Fleet shortly before the bombing of Pearl Harbor

Airships in International Affairs 1890 - 1940 J. Duggan, H. Meyer, 2001-09-25 This book analyses the unique psychological appeal of the airship worldwide and shows how this appeal was exploited for ulterior political purposes They were used by Count Zeppelin to advance German militarism American Admiral Moffett to fight US Army aviation ambitions British Lord Thomson to foster Socialism and strengthen Empire ties Mussolini to promote Italian Fascism Stalin to foster world Communism and Hitler to promote Nazi ideology As airships roamed worldwide so they carried these political influences with them
