*Handbook on Electronic Commerce* Michael Shaw, Robert Blanning, Troy Strader, Andrew Whinston, 2012-12-06 The U S and other developed nations are undergoing a transition from a paper economy to a digital economy not unlike the transition from an oral exchange economy to a physically recorded clay papyrus exchange economy that took place several millennia ago As with the earlier transition a change in the medium for recording and reporting

transactions i e from oral to written from written to electronic is bringing about a significant change in the economic and social system in which they are imbedded The oral to written transition eventually gave us the concepts of property rights commercial law accounting standards and financial transparency What will the written to electronic transition give us The answer is not clear but we can expect that the economic system that follows this transition will differ substantially from the current system to which we are accustomed In this book we examine the electronic exchange mechanisms of the emerging digital economy We do so by examining eight salient topics in electronic commerce EC Each of these topics is examined in detail in a separate section of this book      Smart Card Application Development Using Java Uwe Hansmann,Martin S. Nicklous,Thomas Schäck,Frank Seliger,2012-12-06 In today s world smart cards play an increasingly important role in everyday life We encounter them as credit cards loyalty cards electronic purses health cards and as secure tokens for authentication or digital signature Their small size and the compatibility of their form with the magnetic stripe card make them the ideal carriers of personal information such as secret keys passwords customization profiles and medical emergency information This book provides a guide for the rapid development of smart card applications using Java and the OpenCard Framework It gives you the basic information you need about smart cards and how they work It shows in detail how to develop applications that use smart cards by guiding you through examples step by step A smart card provided along with the book will help you to quickly get some first hands on experience      *The Handbook of Technology Management, Supply Chain Management, Marketing and Advertising, and Global Management* Hossein Bidgoli,2010 The discipline of technology management focuses on the scientific engineering and management issues related to the commercial introduction of new technologies Although more than thirty U S universities offer PhD programs in the subject there has never been a single comprehensive resource dedicated to technology management The Handbook of Technology Management fills that gap with coverage of all the core topics and applications in the field Edited by the renowned Doctor Hossein Bidgoli the three volumes here include all the basics for students educators and practitioners      *Smart Card* Scott B. Guthery,Timothy M. Jurgensen,1998 Smart Card Developer s Kit is designed to provide the practical information you need to design and build applications that incorporate smart cards Using a combination of detailed exposition technical reference summaries and extended examples this book familiarizes you with the unique strengths and capabilities of this emerging computer technology Increase your security from a one factor security a password to a two factor security a smart card and its PIN Use the smart card as a portable place to carry your personal preference information and your identity establishing private signing key In marketing applications a smart card offers a much wider and more flexible set of customer benefits than a magnetic strip card or a paper record card A smart card can also carry secured information such as medical records licenses subscriptions and accreditations that must be guarded against tampering      **Computer Theology** Timothy Jurgensen,Bertrand du Castel,Timothy M. Jurgensen,2008 Computers are complex tools of the human species To make them

work well for us we have to specify their actions in very great detail When properly instructed networks of computers take on the trappings of human social orders derived from the physiological characteristics and capabilities of our species To create a social order we engage in grouping mechanisms through which the actions of the individuals within the group are influenced From a technical perspective such grouping mechanisms form the trust environments within which we can effect policy Historically the most comprehensive such environments have been formed by religions Within a specific religion the policy framework is established by a statement of theology So if we connect all the dots when we want to tell our computers how to act in a manner paralleling human social orders we must define for them a theology So goes the rationale explored in great detail by the authors of Computer Theology Based on their combined tenure of almost a century working in the realms of computer systems and their ubiquitous networks du Castel and Jurgensen have expressed both social and computer systems through the same concepts The result offers a unique perspective on the interconnection between people and machines that we have come to understand as the World Wide Web

*Information Security and Cryptology - ICISC 2001* Kwangjo Kim, 2003-07-31 Annually sponsored by the Korea Institute of Information Security and Cryptology KIISC the fourth International Conference on Information Security and Cryptology ICISC2001 was held at the 63 Building in Seoul Korea December 6-7 2001 The 63 Building consisting of 60 stories above the ground and 3 stories underground stands soaring up into the sky on the island of Yoido the Manhattan of Korea and ranks by far the tallest of all buildings in the country The program committee received 102 submissions from 17 countries and regions Australia Belgium China Denmark France Germany India Italy Japan Korea The Netherlands Spain Taiwan Thailand Vietnam UK and USA of which 32 were selected for presentation in 8 sessions All submissions were anonymously reviewed by at least 3 experts in the relevant areas There was one invited talk by David Pointcheval ENS France on Practical Security in Public Key Cryptography We are very grateful to all the program committee members who devoted much effort and valuable time to reading and selecting the papers These proceedings contain the final version of each paper revised after the conference Since the revised versions were not checked by the program committee rigorously the authors must bear full responsibility for the contents of their papers
