Temperature Measurement at the National Physical Laboratory Cecil Robert Barber, 1973 *Temperature Measurement at the National Physical Laboratory* C. R. Barber, 1970 *Principles and Methods of Temperature Measurement* Thomas D. McGee, 1988-05-19 The concept of temperature The thermodynamic temperature scale Entropy temperature and statistical mechanics The international practical temperature scale General characteristics of temperature measuring devices and treatment of data Liquid in glass thermometers Sealed liquid or gas sensing instruments and bimetallic sensors Electrical resistance temperature measurement using metallic sensors Thermistors and semiconductors for temperature measurement Thermoelectric temperature measurement Theory of radiant heat transfer as a basis for temperature measurement by radiant techniques The disappearing filament optical pyrometer Photoelectric optical pyrometers automatic and infrared Total radiation pyrometers Novel methods of temperature measurement Pyrometric cones Calibration methods Installation effects Dynamic response of sensors Temperature instrumentation and control Thermocouple reference tables Units and Standards of Measurement Employed at the National Physical Laboratory: Temperature National Physical Laboratory (Great Britain), 1951 Radiometric Temperature Measurements, 2009-11-18 This book describes the practice of radiation thermometry both at a primary level and for a variety of applications such as in the materials processing industries and remote sensing This book is written for those who will a apply radiation thermometry in industrial practice b use radiation thermometers for scientific research c the radiation thermometry specialist in a national measurement institute d developers of radiation thermometers who are working to innovate products for instrument manufacturers and e developers non contact thermometry methods to address challenging thermometry problems The author s of each chapter were chosen from a group of international scientists who are experts in the field and specialist s on the subject matter covered in the chapter A large number of references are included at the end of each chapter as a resource for those seeking a deeper or more detailed understanding This book is more than a practice guide Readers will gain in depth knowledge in 1 the proper selection of the type of thermometer 2 the best practice in using the radiation thermometers 3 awareness of the error sources and subsequent appropriate procedure to reduce the overall uncertainty and 4 understanding of the calibration chain and its current limitations Coverage of all fundamental aspects of the radiometric measurements Coverage of practical applications with details on the instrumentation calibration and error sources Authors are from the national labs internationally leading in R D in temperature measurements Comprehensive coverage with large number of references Units and Standards of Measurement Employed at the National Physical Laboratory. 4- Temperature. (2Nd Ed. 1966.). National Physical Laboratory (Great Britain), 1967 Optical Radiometry for Ocean Climate Measurements, 2014-11-13 This book presents the state of the art of optical remote sensing applied for the generation of marine climate quality data products with contributions by international experts in the field The chapters are logically grouped into six thematic parts each introduced by a brief

overview The different parts include i requirements for the generation of climate data records from satellite ocean measurements and additionally basic radiometry principles addressing terminology standards measurement equation and uncertainties ii satellite visible and thermal infrared radiometry embracing instrument design characterization and pre and post launch calibration iii in situ visible and thermal infrared radiometry including overviews on basic principles technology and measurements methods required to support satellite missions devoted to climate change investigations iv simulations as fundamental tools to support interpretation and analysis of both in situ and satellite radiometric measurements v strategies for in situ radiometry to satisfy mission requirements for the generation of climate data records and finally vi methods for the assessment of satellite data products Fundamentals of measurement theory are taken through to implementation of practical ground based radiometers and their application to validate satellite data used to generate climate data records This book presents practical solutions for those involved or contemplating the validation of optical climate measurements from satellite instruments Exhaustive coverage of important topics Fundamental and advanced discussions of many types of instruments Emphasis on calibration and uncertainty analysis of results *Journal of Scientific Instruments* ,1923 **Bibliography of Temperature Measurement** United States.
