Teoría De La Inteligencia Creadora:

Teoría de la inteligencia creadora José Antonio Marina,1996 **La conciencia trágica en Fernando Savater y José Antonio Marina** Fernando Susaeta Montoya,2006 **Exploraciones creativas. Prácticas artísticas y culturales de los nuevos medios** Jordi Alberich i Pascual,Ruth Pagès,2010

Qu tienen en com n el arte digital los juegos de localizaci n geotagging o el audiovisual en Internet El estudio de las diversas formas art sticas y culturales de los nuevos medios ha cobrado inter s gracias al nivel de desarrollo alcanzado por las tecnolog as digitales en los ltimos a os ofreciendo nuevas posibilidades para la creaci n y la experiencia art stica La utilizaci n de los nuevos medios no s lo como herramientas de trabajo sino como medios de producci n almacenamiento re presentaci n e interacci n social es el rasgo compartido por todas estas pr cticas a la vez que define y constituye su propia especificidad El presente libro aborda el estudio de las pr cticas art sticas como punto de partida dentro de un contexto cultural m s amplio proponiendo la reflexi n en tres sentidos los objetos art sticos y culturales los discursos y las teor as sobre los mismos y su impacto real sobre las estructuras sociales Desde una perspectiva interdisciplinar historia y teor a del arte comunicaci n audiovisual o cultura digital entre otros los distintos cap tulos que conforman esta obra pretenden aportar una visi n poli drica de unas pr cticas en continuo dinamismo donde muchos de los conceptos tradicionales tales como autor artista creatividad industria trabajo cultura o participaci n aplicadas al contexto de los nuevos medios comienzan a hacerse permeables y su significado se ampl a y modifica The Neuroscience of Freedom and Creativity Joaquín M. Fuster,2013-08-29 Joaqu n M Fuster is an eminent cognitive neuroscientist whose research over the last five decades has made fundamental contributions to our understanding of the neural structures underlying cognition and behaviour This book provides his view on the eternal question of whether we have free will Based on his seminal work on the functions of the prefrontal cortex in decision making planning creativity working memory and language Professor Fuster argues that the liberty or freedom to choose between alternatives is a function of the cerebral cortex under prefrontal control in its reciprocal interaction with the environment Freedom is therefore inseparable from that circular relationship The Neuroscience of Freedom and Creativity is a fascinating inquiry into the cerebral foundation of our ability to choose between alternative actions and to freely lead creative plans to their goal Latin American Women and Research Contributions to the IT Field Negrón, Adriana Peña Pérez,Muñoz, Mirna,2020-12-18

Although the effort to involve women in engineering has risen in recent years with the creation of new initiatives and the promotion of inclusion in technical disciplines the active participation of women in engineering professions is continuously lower than expected While the need for engineers appears to be constantly increasing women still do not fill most of this role and have a long way to go to even reach an equal split in the field This gender gap has a significant impact how women in the STEM fields are perceived as well as their experiences in their education and careers When it comes to Latin American women in IT their contribution to science can go unnoticed their participation levels in these fields are very low and they

often occupy lower level positions than their male counterparts These issues need to be discussed and the experiences of women who work in the field must be shared Latin American Women and Research Contributions to the IT Field highlights the important role of Latin American women in IT by collecting and disseminating their frontier research contributions in order to provide more visibility and inspire greater participation of Latin American women within the major field of computer science With chapters contributed by female authors from eight Latin American and Caribbean countries the book provides a deep analysis of these women s trajectory paths to high quality theoretical and applied relevant research in computer science and IT While highlighting areas such as inclusivity and STEM education along with advancements and achievements in topics that include nonverbal interaction in virtual reality fuzzy logic applications in education and ant colony optimization this book is ideal for professionals academics students and researchers working in the fields of information technologies and computer science as well as those interested in gender and women s studies

Philosophical Foundations of Economic Reality

Javier Aranzadi,2024-10-07 The dominant paradigm of the economy is based on homo economicus and its positivist mechanistic and utilitarian approach This leads to a form of technical liberalism advocating a market without society in which individuals are reduced to property rights and data subject to commercial transaction This book argues for a reconceptualisation of the philosophical foundations of economic reality in the 21st century Drawing on the continental tradition the book shows that adopting and combining anthropological ethical and metaphysical approaches can provide the basis for a better integration of markets so that they work with rather than against individual and social needs To correctly interpret the market as an institution and the firm as a social organisation the book explores concepts from the philosophy of action to show that it is people who literally create economic reality by providing for their needs through their creativity The book also explores the ethics that structure human behaviour providing a comparison between utilitarian ethics hedonistic ethics and first person ethics or virtues This discussion provides a philosophical foundation for human action grounded in metaphysics The metaphysical approach helps to overcome the modernist reductionism of the human to a life of individual purpose and instead look towards a larger goal the common good This book marks a significant addition to the literature on the philosophy of economics ethics and markets institutions and economic theory more broadly

Leer, pensar, saber Juan

The Aesthetics of Sensations in Mexican Electronic Art

Cynthia P. Villagómez Oviedo,2025-04-06 La Est tica de las Sensaciones en el Arte Electr nico Mexicano aborda el estudio de los or genes del arte electr nico en M xico las diferencias entre arte contempor neo arte electr nico y arte digital dando un giro para detenerse en el an lisis de los fundamentos en los procesos de creaci n con un enfoque en los procesos de los

artistas electrónicos mexicanos También se estudia el papel de la interacción del público en las obras artísticas de arte electrónico y cómo debido a la interacción es posible inducir cierta gama de emociones en el usuario De tal manera que se hace necesario establecer categorías temáticas en el arte electrónico mexicano y sus obras debido a la existencia de una interrelación entre emociones e interacción Por ello hemos creado un modelo de inducción de emociones con el fin de contribuir a la comprensión de esta rama del arte contemporáneo y su didáctica tanto dentro como fuera de las instituciones educativas La Estética de las Sensaciones en el Arte Electrónico Mexicano es un libro para los amantes del arte así como para los artistas noveles y experimentados que deseen implementar estrategias conscientes en sus procesos de producción artística DOI <https://doi.org/10.52501/cc.167>

Genios y creativos Francisco Alonso-Fernández, 2017-03-01 La creatividad a menudo molesta, impertinente y contestona, no sigue líneas trazadas. Cómo distinguir y entender el talento creador tan necesario y valioso en tiempos de cambio. ¿Qué diferencia hay entre un creativo, un superdotado o un genio? El doctor Francisco Alonso Fernández lo explica en este libro con la maestría del sabio indagando en las diversas personalidades históricas de la literatura, la música o la pintura. Esta es una obra impresionante y reveladora para todo el que desea entender y reconocer el talento en sus diversas formas. Genios y creativos consta de siete capítulos dedicados a explorar diferentes facetas del genio: como su inteligencia, sus circunstancias y su relación con la familia y el trabajo, entre otros. El libro cuenta asimismo con una carta al lector y una introducción en las que el autor contextualiza la obra y define su propósito: ayudar a comprender al genio desde la reflexión intelectual y la afectividad, con el objetivo de que tanto ellos como sus creaciones puedan ser reconocidos y apreciados en vida.

La enseñanza de lo proyectual Frigerio, Bossero, 2021-09-06 El detenernos hoy a repensar tantos años de enseñanza universitaria, primero en los cursos de grado de la Carrera de Arquitectura y luego desde el anclaje en el CBC 1985 por considerarlo el lugar de mayor incidencia para una transformación de la enseñanza de la FADU, es un interesante ejercicio de evaluación académica afectiva ya que permite una pintura en la que algunas pinceladas iluminan los hallazgos y los logros y otras las dificultades y los fracasos circunstanciales. Podemos calificar al intento de una transformación estructural de las relaciones docente-alumno y alumno-alumno en el contexto tan diferente al histórico en el que se formaron y que los colocó abruptamente en el escenario del alumnado universitario. Hablamos de comprender desde otro lugar las relaciones de los alumnos entre sí y con su docente como propósito explícito a alcanzar para la generación de un ámbito que favorezca la apropiación de los contenidos curriculares y posibilitar la integración de alumnos con formaciones muy dispares. Desde este posicionamiento se busca ayuda para incorporar algunos saberes que se intuían necesarios pero que les faltaban para realizar el paso desde un trabajo interdisciplinario a un producto transdisciplinario como superador de la sumatoria de abordajes de las distintas carreras. El grupo de aprendizaje posibilita al docente y al estudiante ser coactores de la construcción y transformación del contexto educativo social.
