*The Hunt for the Whooping Cranes; a Natural History Detective Story* Joseph J. McCoy, **The Man Who Saved the Whooping Crane** Kathleen Kaska, 2012-09-16 Millions of people know a little bit about efforts to save the whooping crane thanks to the movie *Fly Away Home* and annual news stories about ultralight planes leading migratory flocks But few realize that in the spring of 1941 the population of these magnificent birds pure white with black wingtips standing five feet tall with a seven foot wingspan had reached an all time low of fifteen Written off as a species destined for extinction the whooping crane has made a slow but unbelievable comeback over the last seven decades This recovery would have been impossible if not for the efforts of Robert Porter Allen an ornithologist with the National Audubon Society whose courageous eight year crusade to find the only remaining whooping crane nesting site in North America garnered nationwide media coverage His search and his impassioned lectures about overdevelopment habitat loss and unregulated hunting triggered a media blitz that had thousands of citizens on the lookout for the birds during their migratory trips Allen s tireless efforts changed the course of U S environmental history and helped lead to the passage of the Endangered Species Act in 1973 Though few people remember him today his life reads like an Indiana Jones story full of danger and adventure failure and success His amazing story deserves to be told **The Hunt for the Whooping Cranes** Joseph J. McCoy, 1996 Conservationists embark on a desperate hunt to find the last of the whooping cranes nesting grounds **Sandhill and Whooping Cranes** Paul A. Johnsgard, 2011-01-01 Driving west from Lincoln to Grand Island Nebraska Paul A Johnsgard remarks is like driving backward in time I suspect he says that the migrating cranes of a preice age period some ten million years ago would fully understand every nuance of the crane conversation going on today along the Platte **A Chorus of Cranes** Paul A. Johnsgard, 2020-01-27 A look at the natural history biology and conservation issues faced by cranes in North America featuring beautiful photos Accompanied by the stunning photography of Thomas D Mangelsen **A Chorus of Cranes** details the natural history biology and conservation issues surrounding the abundant sandhill crane and the endangered whooping crane in North America Author Paul A Johnsgard one of the leading authorities on cranes and crane biology describes the fascinating social behaviors beautiful natural habitats and grueling seasonal migrations that have stirred the hearts of people as far back as medieval times and garnered the crane a place in folklore and mythology across continents Johnsgard has substantially updated and significantly expanded his 1991 work *Crane Music* incorporating new information on the biology and status of these two North American cranes and providing abbreviated summaries on the other thirteen crane species of the world The stories of these birds and their contrasting fates provide an instructive and moving history of bird conservation in North America **A Chorus of Cranes** is a gorgeous and invaluable resource for crane enthusiasts birders natural historians and conservationists alike The University Press of Colorado gratefully acknowledges the generous support of the Iain Nicholson Audubon Center at Rowe Sanctuary Audubon Nebraska Ron and Judy Parks Wagon Tongue Creek Farm and the

Trull Foundation toward the publication of this book In this glorious book Paul Johnsgard and Tom Mangelsen have captured the very essence of these ancient birds their beauty grace of movement and fascinating lives It is a must for crane lovers birders and all who love the natural world Jane Goodall Johnsgard is the world s leading synthesizer of our knowledge of birds and the presenter of such varied and complex information to both professional and lay audiences He has made an enormous contribution to our planet In his latest book *A Chorus of Cranes* the splendor of Johnsgard s lyrical style is matched by incomparable images from one of the world s best known photographers and fellow Nebraskan Tom Mangelsen George Archibald Co Founder and Senior Conservationist International Crane Foundation

Paul A. Johnsgard,1998-02-01 Graced with illustrations by the author *Crane Music* introduces the two North American crane species The sandhill most often seen is within easy reach of bird watchers in the center of the continent Less visible is the whooping crane struggling back from near extinction Paul Johnsgard follows these elegant birds through a year s cycle describing their seasonal migrations natural habitats breeding biology call patterns angelic to the bird lover s ear and fascinating dancing The largest and most spectacular migratory concentration of cranes happens each spring when the Platte River valley becomes the staging ground for an amazing gathering of four hundred thousand to five hundred thousand sandhills en route from the South to the Arctic tundra Johnsgard describes this incredible event as well as memorable personal encounters with the cranes His knowledge of them transcends natural history covering their importance in religion and mythology
