The Image Of Eternity Roots Of Time In The Physical World:

The Image of Eternity David Park,1981 **Time, Love , Memory** Jonathan Weiner,2014-05-14 The story of Nobel Prize winning discoveries regarding the molecular mechanisms controlling the body's circadian rhythm How much of our fate is decided before we are born Which of our characteristics is inscribed in our DNA Weiner brings us into Benzer's Fly Rooms at the California Institute of Technology where Benzer and his associates are in the process of finding answers often astonishing ones to these questions Part biography part thrilling scientific detective story Time Love Memory forcefully demonstrates how Benzer's studies are changing our world view and even our lives Jonathan Weiner winner of the Pulitzer Prize for The Beak of the Finch brings his brilliant reporting skills to the story of Seymour Benzer the Brooklyn born maverick scientist whose study of genetics and experiments with fruit fly genes has helped revolutionize our knowledge of the connections between DNA and behavior both animal and human **The Syntax of Time** Peter Manchester,2005-10-01 The fourth century Neoplatonist Iamblichus interpreting Plotinus on the topic of time incorporates a diagram of time that bears comparison to the figure of double continuity drawn by Husserl in his studies of time Using that comparison as a bridge this book seeks a phenomenological recovery of Greek thought about time It argues that the feature of motion that the word time designates in Greek differs from what most modern scholarship has assumed that the very phenomenon of time has been misidentified for centuries This leads to corrective readings of Plotinus Aristotle Parmenides and Heraclitus all looking back to the final phrase of the fragment of Anaximander from which this volume takes its title according to the syntax of time

The Time Dimension T K. Das,1990-04-17 This is the first comprehensive bibliography of temporal scholarship research on the subject of time and the phenomenon of time itself As the author notes in his introduction the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields By bringing together the most significant published works in a wide variety of disciplines this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials Throughout the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management time series analysis or forecasting Organized by discipline the work begins with an initial chapter that lists general works on the time dimension Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology economics futures studies history linguistics management studies psychology and more The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings Within each chapter entries are arranged alphabetically by author or editor Nearly all sources are from scholarly journals and books **Library Lin's Curated Collection of Superlative Nonfiction** Linda Maxie,2022-05-05 Trust a librarian to help you find books you'll want to read Library Lin's Curated Collection of Superlative Nonfiction is a librarian's A list of nonfiction books organized by

subject area just like a library Linda Maxie Library Lin combed through 65 best books lists going back a century She reviewed tens of thousands of books sorted them according to the Dewey Decimal Classification system and selected an entire library's worth for you to browse without leaving home Here you'll find Summaries of outstanding titles in every subject Suggestions for locating reading material specific to your needs and interests In this broad survey of all the nonfiction categories you will find titles on everything from the A bomb to Zen Buddhism You might find yourself immersed in whole subject areas that you never thought you'd be interested in

Awaiting Apocalypse P. Corcoran, 1999-12-03 The current obsession with the end of the millennium illustrates the enduring power of the idea of endings This fascination cannot be simply dismissed as faulty logic a form of madness or a primitive survival of childish thinking Opening a path of understanding between ancient conceptions of meaning and the sceptical predicates of modern science Awaiting Apocalypse shows how ordinary and extraordinary endings are inherent in the narrative structure of human experience and the sedimentation of that experience as historical meaning

Information Theory Applied To Space-time Physics Henning F Harmuth, 1993-01-31 The success of Newton's mechanic Maxwell's electrodynamic Einstein's theories of relativity and quantum mechanics is a strong argument for the space-time continuum Nevertheless doubts have been expressed about the use of a continuum in a science squarely based on observation and measurement An exact science requires that qualitative arguments must be reduced to quantitative statements The observability of a continuum can be reduced from qualitative arguments to quantitative statements by means of information theory Information theory was developed during the last decades within electrical communications but it is almost unknown in physics The closest approach to information theory in physics is the calculus of propositions which has been used in books on the frontier of quantum mechanics and the general theory of relativity Principles of information theory are discussed in this book The ability to think readily in terms of a finite number of discrete samples is developed over many years of using information theory and digital computers just as the ability to think readily in terms of a continuum is developed by long use of differential calculus

Primordial Time Donald A. Crosby, 2020-03-09 What if there is no such thing as a real passage of time What differences would this idea make for our conception of the world and of our lives in the world Donald A Crosby's Primordial Time Its Irreducible Reality Human Significance and Ecological Import defends the objective underived reality of time and its crucial existential significance on the basis of the essential role of the qualitative inner experiences of the passage of time and with a variety of other scientific and philosophical arguments concerning time He also explores the urgent reality of time in relation to the ecological crisis of our day

Long History, Deep Time Ann McGrath, Mary Anne Jebb, 2015-08-17 The vast shape-shifting continent of Australia enables us to take a long view of history We consider ways to cross the great divide between the deep past and the present Australia's human past is not a short past so we need to enlarge the scale and scope of history beyond 1788 In ways not so distant these deeper times happened in the same places where we walk today Yet they were not the same places having

different surfaces ecologies and peoples Contributors to this volume show how the earth and its past peoples can wake us up to a sense of place as history as a site of both change and continuity This book ignites the possibilities of what the spaces and expanses of history might be Its authors reflect upon the need for appropriate feasible timescales for history pointing out some of the obstacles encountered in earlier efforts to slice human time into thematic categories Time and history are considered from the perspective of physics archaeology literature western and Indigenous philosophy Ultimately this collection argues for imaginative new approaches to collaborative histories of deep time that are better suited to the challenges of the Anthropocene Contributors to this volume including many leading figures in their respective disciplines consider history s temporality and ask how history might expand to accommodate a chronology of deep time Long histories that incorporate humanities science and Indigenous knowledge may produce deeper meanings of the worlds in which we live
