Life Warren A. Peterson, Jill S. Quadagno, 1985-06 As people age they become less mobile and social networking becomes more difficult to maintain This book examines the support networks of the elderly and reaches the conclusion that older people do not engage in relationships on the basis of a one sided dependency rather relationships tend to be reciprocal or interdependent The authors offer a positive and realistic approach to the relationship between the elderly and society

The Human Experience of Space and Place Anne Buttner, David Seamon, 2015-06-03 Humanistic geography is one of the major emerging themes which has recently dominated geographic writing Anne Buttner has been one of the leading figures in the rise of humanistic geography and the research students she collected round her at Clark University in the 1970s constituted something of a school of humanistic geographers This school developed a significantly new style of geographical inquiry giving special emphasis to people's experience of place space and environment and often using philosophical and subjective methodology This collection of essays first published in 1980 brings together this school and offers insight into philosophical and practical issues concerning the human experience of environments An extensive range of topics are discussed and the aim throughout is to weave analytical and critical thought into a more comprehensive understanding of lived experience This book will be of interest to students of human geography *Learning in the Later Years* Victor M.

Agruso, 1978 Social Networks and the Life Course Duane F. Alwin, Diane H. Felmlee, Derek A. Kreager, 2018-03-06 This volume engages the interface between the development of human lives and social relational networks It focuses on the integration of two subfields of sociology social science the life course and social networks Research practitioners studying social networks typically focus on social structure or social organization ignoring the complex lives of the people in those networks At the same time life course researchers tend to focus on individual lives without necessarily studying the contexts

of social relationships in which lives are embedded and linked to one another through social networks These patterns are changing and this book creates an audience of researchers who will better integrate the two subfields It covers the role of social networks across the life span from childhood and adolescence to midlife through old age **Treating the Changing Family** Michele Harway,1996 Receiving special attention are the structure dynamics and unique problems of families that do not fit the traditional mold Experts in these areas share their findings and provide clinical guidelines for treating bi nuclear single parent gay and lesbian and other nontraditional families **Bibliography of Agriculture** ,1985-10 *Lesbians Over 60 Speak for Themselves* Monika Kehoe,1989 This pioneering effort is the first attempt to reach a nationwide representation of lesbian elders in order to understand this deeply hidden segment of our population The women in *Lesbians Over 60 Speak for Themselves* candidly describe their necessarily secret lives in a hostile society how they feel about being different how they cope with the homophobia that surrounds them their most pressing problems how aging has affected them as well as the most intriguing topic their sexual behavior as it was in their youth and as it is now This powerful book provides fascinating demographics about this previously neglected group of women and thoroughly explores their intimate thoughts and feelings about aging and lesbianism **Handbook of Aging and the Social Sciences** Linda George,Kenneth Ferraro,2015-08-18 *Handbook of Aging and the Social Sciences* Eighth Edition presents the extraordinary growth of research on aging individuals populations and the dynamic culmination of the life course providing a comprehensive synthesis and review of the latest research findings in the social sciences of aging As the complexities of population dynamics cohort succession and policy changes modify the world and its inhabitants in ways that must be vigilantly monitored so that aging research remains relevant and accurate this completely revised edition not only includes the foundational classic themes of aging research but also a rich array of emerging topics and perspectives that advance the field in exciting ways New topics include families immigration social factors and cognition caregiving neighborhoods and built environments natural disasters religion and health and sexual behavior amongst others Covers the key areas in sociological gerontology research in one volume with an 80% update of the material Headed up by returning editor Linda K George and new editor Kenneth Ferraro highly respected voices and researchers within the sociology of aging discipline Assists basic researchers in keeping abreast of research and clinical findings Includes theory and methods aging and social structure social factors and social institutions and aging and society Serves as a useful resource an inspiration to those searching for ways to contribute to the aging enterprise and a tribute to the rich bodies of scholarship that comprise aging research in the social sciences
