Arthur A. Natella, Jr.

The Latin American Mind:

Exploring the Latin American Mind Seymour B. Liebman, 1976 **The Latin-American Mind** Leopoldo Zea, 1963 The present book seeks to present a comprehensive picture of one of the most important stages in Hispanic American thought a stage during which there were ardent discussions of the problems presented by the incorporation of Hispanic America into the new social political and educational currents once political independence had been won from Spain This period was regarded as the incorporation of Hispanic America into civilization There followed a discussion of the problems arising from the formation of a new order that was to be a worthy substitute for the repudiated colonial order **The Latin-American Mind** Leopoldo Zea, 1970 *The Latin-American Mind*, 1963 *Exploring the Latin American Mind* Seymour B. Liebman, 1976 The Latin-American Mind Alfred Barnaby Thomas, 1949 **The State of the American Mind: Stupor and Pathetic Docility** Amechi Okolo PhD, 2010-06-10 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have

laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

Michel Bourdeau, Mary Pickering, Warren Schmaus, 2018-05-22 Auguste Comte's doctrine of positivism was both a philosophy of science and a political philosophy designed to organize a new secular stable society based on positive or scientific ideas rather than the theological dogmas and metaphysical speculations associated with the ancien regime. This volume offers the most comprehensive English language overview of Auguste Comte's philosophy, the relation of his work to the sciences of his day, and the extensive continuing impact of his thinking on philosophy and especially secular political movements in Europe, Latin America, and Asia. Contributors consider Comte's reasons for establishing a Religion of Humanity as well as his views on domestic life and the arts in his positivist utopia. The volume further details Comte's attempt to apply his positive method first to social science and then to politics and morality, thereby defending the continuity of his career while also critically examining the limits of his approach.
