Global Contract Law in the Middle East and North Africa Mohamed Ismail, 2024-08-01 This book comprehensively covers the interplay between cultural and legal globalization and the impact this has on contract law with a particular focus on state contracts within the MENA region The book discusses the roles assumed by Supreme Courts in Egypt and MENA countries in creating unified principles of international contract law in states contracts which are consistent with international commercial contracts principles It makes a powerful argument for further harmonization of contract law in the area and how this can be achieved The book forms a case study of how international harmonization can be achieved through a number of routes such as codification digitalization of processes and contracts private public arbitration and further use of international instruments It also considers the implications of comparative European law convention law and other legal domains particularly international standards on contract law in the MENA region The book suggests how international legal standards can be integrated within contract law and how a harmonious contract law framework can thus be achieved Through analyzing ICSID case law the book argues that unification of contract law principles in the MENA region is a considerable step towards achieving legitimate expectations of foreign investors It argues further that global contract law is underway The book will be of interest to students and scholars in the field of international contract law public law and international law in Egypt and MENA countries **International Investment Law and Arbitration** Todd Weiler, 2005 Presents a collection of essays **South China Sea Oil** Roderick O'Brien, Aims to examine two problems arising from the presence of oil deposits in the South China Sea the first relating to national ownership and the second to the systems used in

Daoudi,2019-03-05 The 1983 collapse of world oil prices revived memories of a time only a decade earlier when the price of a barrel of oil did not exceed three dollars By the late 1970s spot market prices had reached peaks of forty dollars a barrel A major role in creating these new realities was played by the 1973 1974 Arab oil embargo which formed the psychological political and market conditions for the dramatic price surge This important study probes the embargo in detail thoroughly examining its history the motivations that caused it and its ripple effect on world politics and the international economic order The authors carefully examine the interruption of oil supplies to Western Europe during the 1956 Suez Canal crisis the growing momentum of Arab oil leverage beginning with the First Arab Petroleum Congress in 1959 the decline of the oil companies domination of the petroleum industry and the Arab political environment between the 1967 Arab defeat and the 1973 Arab oil embargo The book concludes with a chapter addressing the lessons to be learned from these recent embargoes
