Fixing College Education Charles Muscatine, 2009-08-13 Since his early days at the University of California Berkeley when he was fired for refusing to sign a loyalty oath during the Red Scare Charles Muscatine has been a dedicated teacher and higher education reformer Upon his reinstatement at Berkeley he founded Strawberry Creek College a six year experiment using full professors and small classes to teach lower division students Drawing on this belief in undergraduate teaching Muscatine s new book now offers a radical new design for American college education Muscatine begins with the observation that the mediocre undergraduate curriculum offered by most colleges and universities today is based on outdated ideas of what should be taught and what constitutes good teaching Although Muscatine is himself a well established research scholar he contends that the publish or perish research religion of college and university faculties has seriously damaged undergraduate education He offers a clear distinction between publishable research and the scholarship necessary for good teaching Furthermore he recommends major changes in the education of professors including reconsidering both the requirement of the book length dissertation and the current organization of graduate departments Fixing College Education predicts new roles for students and faculty redefines educational breadth and depth and calls for deeper assessment of learning and teaching Muscatine highlights the outstanding colleges and universities including Harvard Boston University s University Professor s Program Evergreen State College and Fairhaven College at Western Washington University that have already remade their curricula successfully or adopted features like the ones he proposes Muscatine argues that the new curriculum is better able than the old to produce good scholars and good citizens for the twenty first century
