Spence Hardy, 2015-06-05 Excerpt from *The Legends and Theories of the Buddhists Compared With History and Science With Introductory Notices of the Life and System of Gotama Buddha* The system attributed to Gotama Buddha is one of the oldest beliefs in the world It demands therefore a place among the records of religious opinion if for its antiquity alone But it has other claims upon our attention There is in it the germ of many of the speculations that are the most prominent in the shifting philosophies of the present day and it is now professed at the lowest computation by three hundred millions of the human race The information presented in these pages has a further importance as the Dhamma is comparatively unknown in England Of this we have evidence in the singular fact that the name of Gotama Buddha is not found in any work in our language that is exclusively biographical although no uninspired man has exercised a greater influence than he upon
