diversity Handbook of Gender Research in Psychology Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R. McCreary and Joan C. Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the field of psychology and they have been conducted in every sub field of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is the first thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold firm beliefs that aspects of physiology suit men and women for particular social roles Men's greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders in people we look up to Women's reproductive capacity and the caretaking tasks e.g. breastfeeding baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ **Gender in Philosophy and Law** Laura Palazzani, 2012-08-18 This book is an introductory systematic framework in the complex and interdisciplinary sex gender debate focusing on philosophy of law The volume analyses the different theories that have dealt with the gender category highlighting the conceptual premises and the arguments of the most influential theories in the debate which have had repercussions on the field of the ethical and juridical debate with reference to intersexuality transsexualism transgender homosexuality The aim is to offer a sort of conceptual orientation in the complexity of the debate in an effort to identify the various aspects and development processes of the theories so as to highlight the conceptual elements of the theorisations to grasp the problem areas within them It is therefore an overall synthetic and also explicative analysis but not only explicative the aim is to outline the arguments supporting the different theories and the counter arguments too for the purpose of proposing categories to weigh up the elements and to take one's own critical stance with a methodological style that is neither descriptive nor prescriptive but critical *Communicating Power and Gender* Deborah Borisoff, James W. Chesebro, 2011-03-30 As a perceptive and outstanding assessment *Communicating Power and Gender* examines the relationships between gender and power and how they are linked to and transformed by the communication process Within this discussion a host of correlations emerge crossing social cultural historical political and racial spheres In order to anchor their discussion Borisoff and Chesebro define the terms gender power and communication which provides an operational platform from which to view fundamental issues such as the effects of stereotyping and verbal and nonverbal communication by gender The authors also consider four contexts that shape and influence gender socialization and sex role constructions mediated communication and gender roles in various media systems early socialization in the home the educational
