The Liberation Of One:

The Liberation of One Romuald Spasowski,1986 The autobiography of one of the highest ranking Communist officials to defect to the United States **Our New Human Consciousness** Terry Sands,2011-05-12 Every few thousand years our human culture experiences a massive evolutionary transformation In the next few years our consciousness will change very rapidly and move us beyond anything we can presently imagine This change of consciousness is happening naturally to each of us now and it will affect every aspect of how we think how we live and how we love We are a culture in search of its spirit and this change of consciousness is evolutionarily next for humankind on this planet When the awareness opens one may search many avenues and attractions for truth and enlightenment and find the search lacking in result The next step may be the path of Self discovery But the direction on this path will not be given to us by a great teacher who comes down from the mountaintop with answers cast in stone but rather by lots of little great teachers who could be called pathfinders And to move into this new consciousness we will transform the mind and the way it works with new mental skills and mental technology Our success is inevitable The ease or difficulty with which we achieve this success is still in formation We will survive the transition physically The question is whether we will survive psychologically Psychological survival in this transition depends on only one thing Developing the ability and inner discipline to completely instantaneously unquestioningly and continuously adapt to change

The growing pluralization of religion and culture in Europe means that we encounter an increasing number of Buddhist immigrants as well as Western converts. Against this background, in June 2018 the Academy of World Religions and the Numata Center for Buddhist Studies at the University of Hamburg, Germany, invited scholars of Theravada East Asian and Tibetan Buddhism. The questions discussed referred to: Does Buddhism matter today? What can it contribute? Must Buddhism adapt to the modern world? How can Buddhism adapt to a non-Asia context? When Buddhism travels, what must be preserved if Buddhism is to remain Buddhism? The contributions in this volume show not only that Buddhism matters in the West but that it already has its strong impact on our societies. Therefore, universities in Europe should include Buddhist theories and techniques in their curricula. **Comparative Religious Ethics** Darrell J. Fasching, Dell deChant, David M.

Cometan, Astronist Institution, 2019-02-11 The Omnidoxy is the founding treatise of the Astronist religion and was solely authored by the philosopher and religious founder Cometan. Partitioned into twelve disquisitions, each of which is further divided into hundreds of discourses which are themselves titled by those which are known as rubrics. The Omnidoxy has been codified according to a unique writing structure known as insentence. The Omnidoxy not only forms the foundations of Astronism but it remains the primary modern contributor and the book that ignited the establishment of the Astronic tradition of religion which encompasses the philosophy of Astronism. Introducing brand new philosophical concepts such as cosmocentricity, reascensionism, transcensionism, and sentientism amongst many others, the Omnidoxy remains the principal signifier of a new era in philosophy. The Omnidoxy births hundreds of new belief orientations, schools of thought, neologisms, disciplines of study, theories and concepts which when combined and considered collectively have formed the basis of Astronism. The authorship of The Omnidoxy rests with the single individual philosopher Cometan who began writing The
