The Life Of Forms In Art:

The Life of Forms in Art Henri Focillon, 1989-03 In this text Focillon insists that art and its meanings are an inherently dynamic system and that the history of art is one of instabilities fluctuations and discontinuities Artworks are never static empirical entities or pure optical presences but rather the virtual traces of a ceaseless process of becoming **The Life of Forms in Art** Brandon Taylor, 2020-10-01 What is form in modern art How could a work of art achieve its organic life in a world increasingly dominated by mechanism by new technology In this new book Brandon Taylor proposes that biology and the life sciences themselves supplied many of the analogies and metaphors by which modern artists were guided For the creative giants of the period Picasso Mir Kandinsky Strzeminiski Dal Arp Motherwell and Pollock as well as less known figures such as Taeuber Erni and Kobro questions of living form loomed large in studio conversation in the press and in the writings of the artists themselves In a book rich in new research and fresh thinking a well known art historian proposes six modalities of organic and vital life that pervade the radical experiments of modern art the organic the biomorphic the ambiguous the monstrous the dialectical and the liquid **The Life of Forms in Art** Henri Focillon, 1963 *The Life of Forms in Art* Henri Focillon, 1948 **The Life of Forms in Art ... Translated by Charles Beecher Hogan and George Kubler. [With Plates.]** Henri FOCILLON, Charles Beecher HOGAN, George Alexander KUBLER, 1942 **An Analysis of the Life-form in Art** Harrison Allen, 2024-03-01 Reprint of the original first published in 1875 On Form, 2008-09-18 What is form Why does form matter In this imaginative and ambitious study Angela Leighton assesses not only the legacy of Victorian aestheticism and its richly resourceful keyword form but also the very nature of the literary She shows how writers for two centuries and more have returned to the idea of form as something which contains the secret of art itself She tracks the development of the word from the Romantics to contemporary poets and offers close readings of among others Tennyson Pater Woolf Yeats Stevens and Plath to show how form has provided the single most important way of accounting for the movements of literary language itself She investigates for instance the old debate of form and content of form as music or sound shape as the ghostly dynamic and dynamics of a text as well as its long association with the aestheticist principle of being for nothing In a wide ranging and inventive argument she suggests that form is the key to the pleasure of the literary text and that that pleasure is part of what literary criticism itself needs to answer and convey *D'Arcy Wentworth Thompson's Generative Influences in Art, Design, and Architecture* Ellen K. Levy, Charissa N. Terranova, 2021-03-11 Scottish zoologist D Arcy Wentworth Thompson's visionary ideas in *On Growth and Form* continue to evolve a century after its publication aligning it with current developments in art and science Practitioners theorists and historians from art science and design reflect on his ongoing influence Overall the anthology links evolutionary theory to form generation in both scientific and cultural domains It offers a close look at the ways cells organisms and rules become generative in fields often otherwise disconnected United by Thompson's original exploration of how physical forces propel and shape living and

nonliving forms essays range from art art history and neuroscience to architecture design and biology Contributors explore how translations are made from the discipline of biology to the cultural arena They reflect on how Thompson s study relates to the current sciences of epigenesis self organization biological complex systems and the expanded evolutionary synthesis Cross disciplinary contributors explore the wide ranging aesthetic ramifications of these sciences A timeline links the history of evolutionary theory with cultural achievements providing the reader with a valuable resource [The Barbarian Principle](#) Jason M. Wirth,Patrick Burke,2013-09-04 Toward the end of his life Maurice Merleau Ponty made a striking retrieval of F W J Schelling s philosophy of nature The Barbarian Principle explores the relationship between these two thinkers on this topic opening up a dialogue with contemporary philosophical and ecological significance that will be of special interest to philosophers working in phenomenology and German idealism [Rethinking Postwar Europe](#) Barbara Lange,Dirk Hildebrandt,Agata Pietrasik,2019-12-09 The book Rethinking Postwar Europe offers an in depth insight into the largely unexplored topic of artistic practices in the 1940s and 1950s in Europe which until recently had been obscured by ideologies of the Cold War Thanks to the authors diverse methodological backgrounds the volume presents for the first time a comprehensive multilayered narrative focusing on the complexities and entanglements in the artistic field Instead of assessing the postwar period in the traditional way as divided by the Iron Curtain the contributions investigate processes of contact interaction dissemination overlapping and networking Consequently the analysis of a diversified European modernism in both its aesthetic and its socio political dimension resonates with all the different case studies In particular the volume looks at how artists developed designed and re negotiated identities and discourses and sheds new light on the power of art and creative powers in general in a postwar setting of mutilations losses and devastations **The Aesthetics of Image and Cultural Form** Yi Chen,2024-04-24 Offering an alternative mode of visual cultural analysis to the prevalent discursive model this book proposes to situate analysis of Image within formal analyses of culture experience Specifically the discussion draws on theories of affective aesthetics with the view of addressing the sensual form of culture i e cultural form Therefore the volume puts forward a mode of formalist analysis in visual cultural research which takes purchase on the idea of cultural form A continuum of formalist attention between Image analysis visual media industrial design and probing of cultural forms establishes the theoretical underpinning of the book These concepts are expounded through a case study which looks at formal experimentations and debates arising from 1960s avant garde artistic practices in London **Simmel on Culture** Georg Simmel,1997 On Simmel and culture **Absolute Music and the Construction of Meaning** Daniel Chua,1999-11-25 This book is born out of two contradictions first it explores the making of meaning in a musical form that was made to lose its meaning at the turn of the nineteenth century secondly it is a history of a music that claims to have no history absolute music The book therefore writes against that notion of absolute music which tends to be the paradigm for most musicological and analytical studies It is concerned not so much with what music is but with why and how meaning is

constructed in instrumental music and what structures of knowledge need to be in place for such meaning to exist From the thought of Vincenzo Galilei to that of Theodore Adorno Daniel Chua suggests that instrumental music has always been a critical and negative force in modernity even with its nineteenth century apotheosis as absolute music *What Do Pictures Want?* W. J. T. Mitchell, 2013-12-23 Why do we have such extraordinarily powerful responses toward the images and pictures we see in everyday life Why do we behave as if pictures were alive possessing the power to influence us to demand things from us to persuade us seduce us or even lead us astray According to W J T Mitchell we need to reckon with images not just as inert objects that convey meaning but as animated beings with desires needs appetites demands and drives of their own *What Do Pictures Want* explores this idea and highlights Mitchell s innovative and profoundly influential thinking on picture theory and the lives and loves of images Ranging across the visual arts literature and mass media Mitchell applies characteristically brilliant and wry analyses to Byzantine icons and cyberpunk films racial stereotypes and public monuments ancient idols and modern clones offensive images and found objects American photography and aboriginal painting Opening new vistas in iconology and the emergent field of visual culture he also considers the importance of Dolly the Sheep who as a clone fulfills the ancient dream of creating a living image and the destruction of the World Trade Center on 9 11 which among other things signifies a new and virulent form of iconoclasm *What Do Pictures Want* offers an immensely rich and suggestive account of the interplay between the visible and the readable A work by one of our leading theorists of visual representation it will be a touchstone for art historians literary critics anthropologists and philosophers alike A treasury of episodes generally overlooked by art history and visual studies that turn on images that walk by themselves and exert their own power over the living Norman Bryson Artforum
