The Lion, the Dove, & the Lamb A. Bryden Black, 2015-06-22 How might the formal Christian doctrine of the Trinity make a real concrete difference in the lives of individuals and in the life of the church This book proposes there are two parts to answering this important but elusive question In the first place how on earth did the Early Church actually reach its conclusions about this understanding of God and why What s the real point behind their endeavors How might we apprehend what is otherwise sheer mystification or even nonsense in some people s minds Arising out of the answers to such questions we can secondly construct an appropriately simple model of the Trinity By means of this model we can understand with sufficient justice the ways the triune God has come among us in our human history ways that are still ongoing today For the proposed model allows us to begin to appreciate the true mystery of the Christian Faith while also making a practical difference to the lives of Christian discipleship in prayer worship and mission

for the first time is the first critical study of the work of the artist Stephen Cook born 1952 and will serve as both an introduction to and analysis of his output in the context of a tradition of figurative art in post war Britain The scrutiny of the subjects of these paintings point to a representation of a reality outside of the flux of things and of our everyday experience albeit one that is derived from the immediately recognisable natural world This is achieved not only through a method of close observation but through the rigour of the application of that observation

Decolonising Counselling and Psychotherapy Dwight Turner, 2025-03-04 Decolonisation is a term which has become a modern day buzzword as we look to understand the influences of the systemic structures of oppression which have molded all of our identities yet in the worlds of counselling and psychotherapy there has been a struggle to understand what this term means in regard to our profession *Decolonising Counselling and Psychotherapy* considers the ways in which the systems of colonization have taken over and are continually reconstituted within our profession This book challenges our profession by offering practical ways in which we might diversify our practices proffering varying perspectives about how to create pathways for greater inclusion in training courses and examines the many opportunities to explore and expand the ways in which we undertake research Most importantly it will encourage the therapist to look at the internalised experiences of colonisation on themselves The book shows that working creatively with techniques common to counselling and psychotherapy could lead the profession to not only broaden out what it knows and understands of human nature but through a process of decolonisation assist in meeting the needs of a wider range of clients This book will be invaluable to counsellors psychotherapists and psychologists working in the helping professions and to those whose activism drives them to want to make our helping professions more inclusive and equitable
