THE TREES Conrad Richter, 2013-10-02. They moved along in the bobbing springy gait of a family that followed the woods as some families follow the sea. In that first sentence, Conrad Richter sets the mood of this magnificent epic of the American wilderness. Toward the close of the eighteenth century, the land west of the Alleghenies and north of the Ohio river was an unbroken sea of trees. Beneath them, the forest trails were dark, silent, and lonely, brightened only by a few lost beams of sunlight. Here the Lucketts, a wild woodsfaring family, lived their roaming life, pushing ever westward as the frontier advanced and as new settlements threatened their isolation. Richter has written not a historical novel, of which there are so many, but a novel of authentic early American life, of which there are so few. It is the primitive story of Worth Lockett, the hunter, and of Jary, his woman, of Genny Wyitt Achsa, and Sulie, their woods wild children, of the bound boy and the Solitary, and Jake Tench, but principally of the oldest girl, Sayward Lockett, whose people as far back as she knew had always been hunters and gunsmiths, to hunters but who, through the quiet growing and yet tragic oppression of the trees, turns her back at last on her life as a hunter's child and becomes a tiller of the soil. This novel of great lyrical beauty and high excitement tells the story of the transition of American pioneers from the ways of the wilderness to the ways of civilization. Here is the true American epic. Here is the raw adventure, swift and cruel in its episodes, but here too is the poetry of loneliness. Here is a portrait of frontier life as it really must have seemed to the pioneers. Here, in short, is a masterpiece by the man who gave us *The Sea of Grass*.

Our British Trees and how to Know Them Francis George Heath, 1908. [The New Monthly Magazine](#), 1855. [The Major Works](#) Francis Bacon, 2002. This authoritative edition was originally published in the acclaimed Oxford Authors series under the general editorship of Frank Kermode. It brings together an extensive collection of Bacon's writing, the major prose in full, together with sixteen other pieces not otherwise available, to give the essence of his work and thinking. Although he had a distinguished career as a lawyer and statesman, Francis Bacon's lifelong goal was to improve and extend human knowledge. In *The Advancement of Learning* 1605, he made a brilliant critique of the deficiencies of previous systems of thought and proposed improvements to knowledge in every area of human life. He conceived the *Essays* 1597, much enlarged in 1625, as a study of the formative influences on human behaviour, psychological and social. In *The New Atlantis* 1626, he outlined his plan for a scientific research institute in the form of a Utopian fable. In addition to these major English works, this edition includes *Of Tribute*, an important early work here printed complete for the first time, and a revealing selection of his legal and political writings, together with his poetry. A special feature of the edition is its extensive annotation, which identifies Bacon's sources and allusions and glosses his vocabulary.
