Journal of American History **The Education Assemblage** Greg Thompson,2020-04-28 This collection works with the

philosophy of Gilles Deleuze and his collaborator Felix Guattari in the context of education Deleuze once remarked that we
get the philosophy we deserve because of the questions that we ask Deleuze saw that the work of philosophy was the
creation of concepts those working with his theory are admonished not to follow but to think For Deleuze education remained
a philosophical problem because it is connected to problems of language authority meaning and what it means to learn and
think With that in mind these contributions were chosen because they apply this ethic to education to think again about what
constitutes a problem In this book Deleuze s conceptual contributions such as affect assemblage the logic of sense and
control society and modulation are put to work to consider various educational problems in educational settings What brings
these contributions together apart from working with Deleuze is that they present education as a problem requiring new
concepts Readers are invited into an encounter with Deleuze s thought because of the situations in which we find ourselves

The Education of an Artist Charles Lewis Hind,1906 The Societal Unconscious Henning Salling Olesen,2019-12-16

The Societal Unconscious presents an innovative development of theory and methodology for adult education and learning
research recognizing psychodynamic dimensions of learning processes With few exceptions the unconscious has been
neglected in critical adult education research The psychosocial approach in this book seeks to re integrate the societal and
the psychodynamic dimensions in analyzing adult learners and learning processes The book responds to contemporary
awareness of the societal and cultural nature of subjectivity with a new material and dialectic psychosocial theory comprising
conscious as well as unconscious levels Tracing interdisciplinary inspirations it sets a new broad horizon for in depth
understanding of learning in everyday life A number of empirical analyses demonstrate the entanglement of societal and
psychodynamic dimensions of learning Firstly a part of the chapters deals with the complex subjective continuities and
discontinuities in individual learning and career Secondly other chapters comprise analyses of leadership and the social
psychology of organizational processes and the psycho social aspects of institutional regeneration Thirdly the book presents

outlooks into the social psychology dimensions of wider societal and political processes including identity politics and xenophobia A last chapter finalizes the theoretical basis of the methodology **The Mentor-world Traveler** ,1922
