More Than a Health Crisis Jessica Kirk, 2023-10-24 How the West African Ebola epidemic was transformed from an urgent and distant tragedy into an existential threat to American lives establishing the dynamics that would later dominate the US response to epidemics such as COVID 19 In 2014 and 2015 the viral Ebola epidemic in West Africa inspired breathless US media coverage and became the subject of heated public debate over just how to understand the security issue that the outbreak presented Was it a security concern because of the lives at risk in West Africa Or because of its threat to regional and global stability Or was it potentially a threat to the American people In **More Than a Health Crisis** Jessica Kirk reveals how these varied positions spoke to divisions within the American public concerning how we think about and respond to uncertainty competing expertise and securitization Kirk insightfully examines how experts in different fields offered conflicting assessments of the risks posed by Ebola and then goes on to analyze how the US press undermined the authority of the public health experts who accurately predicted that the virus posed little danger to Americans Reading the media coverage of the Ebola epidemic as a case study in the biopolitics of fear Kirk considers how the US response reflected not only anxieties over globalization but also long held narratives about the Dark Continent Finally Kirk shows how the US and global public response to the Ebola outbreak challenged traditional models of securitization and identifies patterns that have tragically recurred with subsequent epidemics such as COVID 19 and monkeypox

Gender, Law, and Religion During the COVID-19 Health Crisis Montserrat Gas-Aixendri, Adelaide Madera, 2025-09-02 Looking at COVID 19 infection through a gendered lens reveals its deep impact on individuals in vulnerable positions especially women It raised new concerns about gender equity and inclusion particularly when gender intersects with other identity markers such as religious affiliation This intersection creates a double vulnerability heightening the risk of discrimination violence hate speech and harassment against women In various legal contexts women bear multiple roles and responsibilities The interaction between gender law religion and the pandemic has often resulted in disempowerment in shaping female identity This is evident both in Western countries where migrant women struggle for full integration and in their countries of origin where they often face the consequences of normative pluralism and insufficient state legal responses The pandemic has generated not only a health crisis but also exacerbated social and economic issues including increased gender based violence in family settings and growing inequalities in access to fundamental rights such as healthcare education employment and justice In this complex framework religious leaders face new challenges and must provide effective responses Female leadership within religious contexts can play a crucial role in advocating for new paradigms that address evolving social cultural and legal needs Religious actors are thus called upon to offer both guidance and support to vulnerable and marginalized members of their communities and to collaborate with governments in shaping a future where religious freedom gender equality gender justice and freedom from discrimination are upheld This volume aims to investigate the pandemic s impact on women within faith communities examine emerging balances between female religious cultural claims and public welfare imperatives and develop gendered intersectional perspectives that promote women s full integration equality and participation in civil society
