Philosophy in the Hellenistic and Roman Worlds Peter Adamson, 2015-08-28 Peter Adamson offers an accessible humorous tour through a period of eight hundred years when some of the most influential of all schools of thought were formed from the third century BC to the sixth century AD He introduces us to Cynics and Skeptics Epicureans and Stoics emperors and slaves and traces the development of Christian and Jewish philosophy and of ancient science Chapters are devoted to such major figures as Epicurus Lucretius Cicero Seneca Plotinus and Augustine But in keeping with the motto of the series the story is told without any gaps providing an in depth look at less familiar topics that remains suitable for the general reader For instance there are chapters on the fascinating but relatively obscure Cyrenaic philosophical school on pagan philosophical figures like Porphyry and Iamblichus and extensive coverage of the Greek and Latin Christian Fathers who are at best peripheral in most surveys of ancient philosophy A major theme of the book is in fact the competition between pagan and Christian philosophy in this period and the Jewish tradition also appears in the shape of Philo of Alexandria Ancient science is also considered with chapters on ancient medicine and the

interaction between philosophy and astronomy Considerable attention is paid also to the wider historical context for instance by looking at the ascetic movement in Christianity and how it drew on ideas from Hellenic philosophy From the counter cultural witticisms of Diogenes the Cynic to the subtle skepticism of Sextus Empiricus from the irreverent atheism of the Epicureans to the ambitious metaphysical speculation of Neoplatonism from the ethical teachings of Marcus Aurelius to the political philosophy of Augustine the book gathers together all aspects of later ancient thought in an accessible and entertaining way

Hellenic Philosophy Christos C. Evangeliou,2018-01-18 Tracing the historical origin and the critical development of Hellenic philosophy from vague and indeterminate beginnings to its classical maturity and fruition in the minds words and works of the Athenian philosophers Socrates Plato and Aristotle this book argues that dignified nobility respectful critique and unfettered freedom of thought and expression clearly defined the character of Classical Hellenic philosophy and that this distinguishes it from philosophies of different eras Evangeliou examines the historical influence of Hellenic philosophy and its complex global relations to other non Hellenic philosophies of Africa Asia and Europe and also considers certain contemporary and sensitive issues which relate to the nature of Western culture and European philosophy Radical and revisionary in nature this work challenges many of the long cherished myths about the influence of Classical Hellenic philosophy on the tradition of Western thought

The Sculptor and his Stone Chrysostomos,2017-01-26 This book argues for the inseparability of classical Hellenism from the Greek patristic tradition from a distinctly Eastern Orthodox perspective Postulating a common striving for truth in both domains it places emphasis on the contributions of the ancients and Greek paideia to Christian learning and culture In the spirit of the late Werner Jaeger the essays contained in the volume provide a fruitful strategy for looking anew at the Greek classical world and Christianity through the eyes of the Greek Fathers the direct inheritors of the ancient Greek worldview Collectively the author and contributors excellently demonstrate that conflated with the visionary insights of the Jewish prophets and of Jewish messianism the wisdom of the ancients served to pave the way for the unfolding of the fullness of Christian teaching and its spiritually enlightening revelation

Dostoevsky's Polyphonic Talent Joe E. Barnhart, 2005 This book illuminates the connectedness of Dostoevsky's literary art with his philosophical and psychological brilliance Two Fyodor Dostoevsky conferences originating at the University of North Texas set the stage for this volume Scholars contributed original papers focusing on how Dostoevsky's literary art and philosophical insights enrich one another Fyodor Dostoevsky wrote and thought polyphonically His polyphonic method is both his special literary technique and his distinctive way of probing theological social and philosophical depths As Bakhtin and Terras suggest all Dostoevsky's major literary inventions from the underground man to the vitriolic Grushenka are products of his ability to listen profoundly to his own characters Like the genius author redactor of 1 and 2 Samuel he reports the heights and depths of human emotion and behavior whether exploring the anatomy of dysfunctional families making the heart soar with Zosima's vision of forgiveness or giving Ivan Karamazov full rein to challenge theism Dostoevsky's characters transform themselves into irregular verbs whose fierce independence emerges only because of their desperate and inescapable interdependence His major characters are text subtext and context for each other They play inside each other's head and answer in one way or another

Platonism and Christian Thought in Late Antiquity Panagiotis G. Pavlos, Lars Fredrik Janby, Eyjólfur Kjalar Emilsson, Torstein Theodor Tollefsen, 2019-06-07 Platonism and Christian Thought in Late Antiquity examines the various ways in which Christian intellectuals engaged with Platonism both as a pagan competitor and as a source of philosophical material useful to the Christian faith The chapters are united in their goal to explore transformations that took place in the reception and interaction process between Platonism and Christianity in this period The contributions in this volume explore the reception of Platonic material in Christian thought showing that the transmission of cultural content is always mediated and ought to be studied as a transformative process by way of selection and interpretation Some chapters also deal with various aspects of the wider discussion on how Platonic and

Hellenic philosophy and early Christian thought related to each other examining the differences and common ground between these traditions Platonism and Christian Thought in Late Antiquity offers an insightful and broad ranging study on the subject which will be of interest to students of both philosophy and theology in the Late Antique period as well as anyone working on the reception and history of Platonic thought and the development of Christian thought [Encyclopedia of Ancient Greece](#) Nigel Wilson,2013-10-31 Examining every aspect of the culture from antiquity to the founding of Constantinople in the early Byzantine era this thoroughly cross referenced and fully indexed work is written by an international group of scholars This Encyclopedia is derived from the more broadly focused Encyclopedia of Greece and the Hellenic Tradition the highly praised two volume work Newly edited by Nigel Wilson this single volume reference provides a comprehensive and authoritative guide to the political cultural and social life of the people and to the places ideas periods and events that defined ancient Greece [The Snow Cone Diaries](#) Juan Valdez,2014-05-15 The content in this work is fiction fiction in the sense that the main character through which the eyes of this metaphysical and philosophical journey is viewed Charlie is not a real character nor are his counterparts and foils through which he explores various topics such as love the meaning of existence or the origins of the cosmos and how our understanding of these abstract ideas have evolved since the dawn of civilization But like any work of fiction the characters do have some basis in real experience from which of course nothing can be created The intent of the work is to explore the foundations and evolution of knowledge and the boundaries between reason and faith boundaries which from the authors perspective are not quite as clear as some might have us believe And the point of going through the exercise the purpose as it were is not only for the author to come to a better understanding of how all our modern branches of science hang together how they have come to be given their socio political and historical context but also for others to share in his journey and perhaps learn something along the way Since the birth of language and thought even going back thousands of years and even prior to the dawn of civilization itself mankind has attempted to answer two fundamental questions questions that have spurred countless creative forces and branches of thought over the centuries namely who we are and from whence we came The answers to these questions no matter what race religion or creed the seeker might be or what philosophy or religion they might adhere to are inextricably linked to each other This journey of trying to understand our place in the world and the origins of the universe itself is an ageless quest that in many respects distinguishes mankind from the rest of the creatures on the planet Furthermore this very same quest to answer the same questions fuels not only scientific development but also is the basis for theology and religion both approaching the same set of questions with a different set of tools and with a different mindset but both trying to answer the same set of basic questions as to who we are and how we got here From the authors perspective in order to answer these questions effectively in the Information Age we should have at least some understanding of the history of our answers to these questions as they have evolved over time For we all build our collective knowledge on those that have come before us

whether we recognize this or not And in turn that in building this bridge a common metaphor used throughout the work we must leverage the tool of metaphysics a term originally coined by Aristotle but in the context of this work implies a level of abstraction that sits above physics as we understand it in today's world but also provides a conceptual underpinning to all of the branches of knowledge that collectively make up our understanding of the world and our place in it In doing so it is the authors hope that we can not only come to a more complete and fuller understanding of the answers to these basic human questions that have plagued mankind since time immemorial but also at the same time perhaps develop a deeper understanding of the problems of life in the Information Age and how we might best approach them or cope with them in way that not only benefits ourselves as individuals but to society as a whole to which our individual well being depends upon whether or not we recognize it or not
