Repatriation of Sacred Indigenous Cultural Heritage and the Law Vanessa Tünsmeier, 2022-01-25 This book examines the ways in

which law can be used to structure the return of indigenous sacred cultural heritage to indigenous communities referred to as repatriation in this volume. In particular, it aims at developing legal structures that align repatriation with contemporary international human rights standards. To do so, it gathers the most valuable lessons learned from different repatriation laws and frameworks adopted in the United States and Canada. In both countries, very different ways of approaching repatriation have been used for several decades, highlighting the context-dependent nature of repatriation. The volume is divided into four parts: looking first at international law, then at the national legal landscape in the United States, followed by Canada, before the different repatriation models are evaluated against the backdrop of human rights law standards. Emphasis is placed not only on repatriation-specific legislation but also on the legal context in which it was developed and operates. In turn, the fourth part develops various models on the basis of these experiences that can be aligned with contemporary indigenous and cultural rights. The book ends by considering the models' suitability for international repatriation and the lessons that can be learned from them. The primary audience includes those addressing the legal hurdles to repatriation, be they researchers, policymakers, communities, or museums.

Archaeology and Heritage Management Usman Ali, 2021-01-10. This volume reconsiders the World Heritage Guidelines to manage cultural and natural heritage sites effectively. The study approaches this in two ways: The first is by evaluating and analyzing the fundamental theories and practice of heritage with comparison to World Heritage prescribed parameters for effective management, particularly authenticity, and the second is about to rereview the international legislation in the context of authenticity of heritage practice as a part of understanding and developing new parameters for conservation, preservation, and management. Usman Ali is an associated researcher at University of Amsterdam, The Netherlands.
