

Husserlian phenomenology

Transcendental/descriptive

Questions of what is known

Mechanical view of person

Ahistorical

Person lives in a world of objects

Analysis focuses on the meaning giving subject

What is shared is the essence of the conscious mind

Meaning is untouched by the interpreter's view of the world

Subject's meanings can be reconstituted by perceiving data to speak for itself

Strict procedures of interpretation guarantee validity

Heideggerian phenomenology

Hermeneutic/interpretive

Questions of what is experienced and understood

Person is viewed as a self-interpreting being

Historicality

Person exists in and is part of the world

Analysis is the relationship between the subject and the situation

What is shared is culture, history and language

Interpreter's worldview plays a role in interpreting data

The interpretation of subjects' meanings can only highlight what is already understood

Development of individual criteria ensuring rapport

The Idea Of Phenomenology Husserlian Exemplarism

Daniele De Santis, Emiliano Trizio

The Idea Of Phenomenology Husserlian Exemplarism:

The Idea of Phenomenology André de Muralt, 1974 The author here engages in the philosophical history of philosophical ideas This distinguishes him from those who do philosophical history of ideas from outside the domain of philosophy proper and on the other hand from those who do historical history of philosophical ideas By philosophical history in general I mean an account of the conceptual lineage of ideas or systems of ideas a discerning of the relations between ideas or systems of ideas a discerning of the relations between ideas with respect to their content and their logical order of precedence apart from the historical sequence in which they are introduced and developed The author's ambition is to carry out such historical inquiries in the form of a structural analysis of philosophy which he regards as a rigorous philosophical discipline that is as a science Translator's Introduction

Ideas toward a Phenomenology of Interruptions Cameron Bassiri, 2018-05-16 This text is the first book length analysis of the problem of the relations between time sleep and the body in Husserl's phenomenology *Ideas toward a Phenomenology of Interruptions* reconfigures the unity of the life of subjectivity in light of the phenomenon of dreamless sleep supplements Husserl's analyses of subjectivity through integrating interruptions into the life of consciousness and establishes a new phenomenological concept of subjectivity that is a fractured subject In analyzing the phenomenon of dreamless sleep the author develops a new theory of the body namely the sleeping body and explains the importance of the lived body in the experience and constitution of time The author analyzes the moments of falling asleep and waking up as well as the period of dreamless sleep and shows that a more complete phenomenological concept of subjectivity requires attention to the interweaving of continuity and discontinuity This project therefore aims to provide a critical counterpart to Husserl's analyses by developing his transcendental phenomenology into a phenomenology of interruptions Through this account of dreamless sleep this text shows furthermore that subjectivity ceases to perceive and experience the flow of time through retention protention and the primal impression and that the time that is not lived through during this period is lost time Moreover it explores the methodological consequences of interruptions for phenomenology and shows that phenomenology reaches its limits in the phenomena of dreamless sleep because it is incapable of fully accessing or accounting for them through the phenomenological reduction

The Subject(s) of Phenomenology

Julian Apostolescu, 2019-12-19 Bringing together established researchers and emerging scholars alike to discuss new readings of Husserl and to reignite the much needed discussion of what phenomenology actually is and can possibly be about this volume sets out to critically re-evaluate and challenge the predominant interpretations of Husserl's philosophy and to adapt phenomenology to the specific philosophical challenges and context of the 21st century What is phenomenology Maurice Merleau-Ponty asks at the beginning of his *Phenomenology of Perception* and he continues It may seem strange that this question still has to be asked half a century after the first works of Husserl It is however far from being resolved Even today more than half a century after Merleau-Ponty's magnum opus the answer is in many ways still up

for grasp While it may seem obvious that the main subject of phenomenological inquiry is in fact the subject it is anything but self evident what this precisely implies Considering the immense variety of different themes and methodological self revisions found in Husserl s philosophy from its Brentanian beginnings to its transcendental re interpretation and last but not least to its crypto deconstruction in the revisions of his early manuscripts and in his later work one cannot but acknowledge the fact that the subject of phenomenology marks an irreducible plurality of possible subjects Paying tribute to this irreducible plurality the volume sets out to develop interpretative takes on the phenomenological tradition which transcend both its naive celebration and its brute rejection to re articulate the positions of other philosophers within the framework of Husserl s thought and to engage in an investigative dialogue between traditionally opposed camps within phenomenology and beyond

Sociology, Ethnomethodology and Experience Mary F. Rogers, 1983-11-25 In this volume first published in 1983 Professor Rogers examines the usefulness of a phenomenological approach to sociology Her broad purpose is to demonstrate the theoretical and methodological advantages phenomenological sociology holds Thus she offers a selective introductory exposition of phenomenology highlighting its relevance for social scientists and undercutting the notion of phenomenology as a non scientific subjective or esoteric method of study

The Self and The Other Anna-Teresa Tymieniecka, 2013-06-29

Husserl and Spatiality Tao DuFour, 2021-11-29 Husserl and Spatiality is an exploration of the phenomenology of space and embodiment based on the work of Edmund Husserl Little known in architecture Husserl s phenomenology of embodied spatiality established the foundations for the works of later phenomenologists including Maurice Merleau Ponty s well known phenomenology of perception Through a detailed study of his posthumously published and unpublished manuscripts on space DuFour examines the depth and scope of Husserl s phenomenology of space The book investigates his analyses of corporeity and the lived body extending to questions of intersubjective intergenerational and geo historical spatial experience what DuFour terms the environmentality of space Combining in depth architectural philosophical investigations of spatiality with a rich and intimate ethnography Husserl and Spatiality speaks to themes in social and cultural anthropology from a theoretical perspective that addresses spatial practice and experience Drawing on fieldwork in Brazil DuFour develops his analyses of Husserl s phenomenology through spatial accounts of ritual in the Afro Brazilian religion of Candomblé The result is a methodological innovation and unique mode of spatial description that DuFour terms a phenomenological ethnography of space The book s profoundly interdisciplinary approach makes an incisive contribution relevant to academics and students of architecture and architectural theory anthropology and material culture and philosophy and environmental aesthetics
