The Industrial Archaeology Of Farming In England And Wales:

The Industrial Archaeology of Farming in England and Wales Nigel Harvey,1980 **Britain 1740 - 1950** Richard Lawton,Colin Pooley,2021-12-02 Originally published in 1992 this book provides students with a well illustrated clearly written text which offers a coherent overview of Britain s development from a pre modern to a modern economy and society The key processes that have shaped the geography of modern Britain are rooted in the significant demographic economic technological and social transitions of the early eighteenth century the impact of which was not fully diffused through the nation until the mid 20th Century This country wide survey examines the nature of this transformation The material in the book is accessible because the book is clearly structured into 3 phases 1740 to the 1830s the 1830s to the 1890s and the 1890s to 1950 For each period the principal aspects of change in population industry the countryside and urban life are examined and regional examples given to support the analysis **An Environmental History of Wildlife in England 1650 - 1950** Tom Williamson,2013-12-05 Choice Outstanding Academic Title 2014 While few detailed surveys of fauna or flora exist in England from the period before the nineteenth century it is possible to combine the evidence of historical sources ranging from game books diaries churchwardens accounts and even folk songs and our wider knowledge of past land use and landscape with contemporary analyses made by modern natural scientists in order to model the situation at various times and places in the more remote past This timely volume encompasses both rural and urban environments from 1650 to the mid twentieth century drawing on a wide variety of social historical and ecological sources It examines the impact of social and economic organisation on the English landscape biodiversity the agricultural revolution landed estates the coming of large scale industry and the growth of towns and suburbs It also develops an original perspective on the complexity and ambiguity of man animal relationships in this post medieval period **The Archaeology of Buildings** Richard K. Morriss,2000 The study of buildings whether out of sheer interest or to assist planning decisions is a branch of archaeology which is distinct from both archaeology and architectural history yet allied to both This book begins by providing background information about studying the basic materials used in a building s construction such as stone brick or timber framing The author explains how various clues left by the builders can add to the historic background and use of the site and explains how all these strands of information can be woven together to produce a detailed understanding of how any building has developed over the years Over 100 illustrations and two invaluable appendices typical examples of buildings and an illustrated glossary of terms complete a handbook that has long been needed by professionals and amateurs alike *The Agrarian History of England and Wales* Edward John T. Collins,Joan Thirsk,2000 The unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns *The industrial archeology of farming in England and Wales* ,1980 **Industrial Archaeology** Marilyn Palmer,2012-10-12 Industrial Archaeology uses the techniques of mainstream archaeological excavation analysis and

interpretation to present an enlightening picture of industrial society Technology and heritage have until recently been the focal points of study in industrialization Industrial Archaeology sets out a coherent methodology for the discipline which expands on and extends beyond the purely functional analysis of industrial landscapes structures and artefacts to a broader consideration of their cultural meaning and value The authors examine for example the social context of industrialization including the effect of new means of production on working patterns diet and health *The Landscape of Britain* Michael Reed,2002-11-01 The Landscape of Britain has a uniquely rich historical diversity In this book explains the processes at work in the evolution of the landscape pointing out examples of surviving evidence from the past The landscape of late twentieth century Britain is the end product of some ten thousand years of human effort directed not only towards satisfying basic physical needs for food and shelter but also towards expressing profound spiritual and intellectual aspirations whether by means of burial mounds or churches schools or monasteries The author shows how each generation makes its own individual contribution without being able entirely to erase those of its predecessors however remote or distant in time Landscape History and Rural Society in Southern England Eric L. Jones,2021-03-08 This book applies an economic and environmental perspective to the history of landscape and the rural economy highlighting their inter connections through specific case studies After explaining how the author made his discoveries and when they started it analyses relations between documentary and landscape evidence It is based on exceptional first hand observation of a dozen sites and close consideration of topics in the ecological and economic history of southern England They range from reclaiming chalk down land occupying low lying heaths and reconstructing parkland to wool stapling and the manufacture of gunstocks for the African slave trade Additional themes include the tension between ecology and institutions in decisions about the location of economic activity the decay of communal farming ahead of enclosure and other interesting puzzles in rural economic history This book offers an original approach to questions in economic history through its synthesis of different types of evidence It will be of interest to a diverse range of readers because it addresses how economic change was registered in the landscape and how that change was influenced by landscape It is a book with highly original features contributing simultaneously to economic agricultural environmental and landscape history A History of Farm Buildings in England and Wales Charles Nigel Harvey,1984
