Hazard Evaluations and Technical Assistance Branch, 1987 *Managing Indoor Air Quality* H. E. Burroughs, Shirley J. Hansen, 2004 This practical desk reference is structured to serve as a guide and information resource both on treating existing indoor air problems effectively and on prevention costly IAQ problems from occurring in the first place Finding solutions to indoor air quality problems is often a complex multifaceted multidisciplined endeavor A single discipline approach from the environmental engineer the industrial hygienist or the medical doctor unfortunately tends to narrow both the control and the treatment options This book cuts

across these professions without being limited by the specificity and bias of any one discipline to offer those concerned with the total facility a broader more comprehensive approach to managing indoor air quality and mitigating indoor air quality problems The third edition has undergone extensive updates and editing in response to the rapid pace of changes and advances in the IAQ industry most notably the new chapter on building security and the increased emphasis on mold related issues Jacket
