Bedgood, 2022-06-07 Why do some leaders succeed and others fail Is there a magic ingredient that the leaders must consider in their career journey to ensure the joy ride does not turn into a nightmare What is the key to maximizing leaders success in ways that are sustainable long term The purpose of this book is to provide a simple road map for leaders aspiring leaders students and anyone interested in the art of leadership to succeed in high risk environments Often leaders don't know what they don't know One main culprit is the lack of assessing measuring analyzing and addressing risk Simply put we don't know what we don't measure What is not known can and will eventually harm leaders organizations and their customers Change is the new normal and only constant As change grows so does risk Risk

countries as well as related safety measures taken by governments and authorities have posed significant challenges to classical music culture. However, they may also have had a stimulating effect on music festivals and opera houses streaming offerings. This book brings together experts from the fields of musicology and music management to share their current empirical research findings on the pandemic-evoked digital transformation of the classical music scene, addressing either the institutional or the reception perspective. Furthermore, it documents discussions with opera dramaturgs and artistic directors as well as music managers and event producers in the classical field to share their practical lockdown experiences and current strategies in dealing with the digital transformation of opera. In this way, the volume combines the perspective of academic researchers with that of practitioners in the field. This book is particularly useful for students and researchers in music and media management as well as musicology. It is also intended to help practitioners from concert houses and opera management such as dramaturges, artistic directors, marketing and communication directors.
